TABLE OF CONTENTS.

	Page
Introduction to Census volumes,	xi–xiii

TABULAR PRESENTATIONS.

Population and Legal Voters,	1-8
Recapitulation. The State and Counties,	8
Population: By Towns, Alphabetically,	9-14
Population for 1885 and 1895: Increase and Decrease. By Towns,	15-24
Towns showing increase,	17-19
Towns showing decrease,	20, 21
Recapitulations. The State and Counties,	22, 23
Population and Sex,	25-32
Recapitulation. The State and Counties,	32
Population for 1885 and 1895: Increase and Decrease. By Sex,	33-42
Recapitulation. The State and Counties,	42
Tabular Analyses,	43-68
Legal voters,	43
Gains and losses in population,	43, 44
Towns showing continuous loss for 20 years,	44, 45
Comparisons between 1875, 1885, and 1895,	45
Concentration of population,	45-48
Population *eight miles* from the State House,	46
Population *ten miles* from the State House,	46, 47
Population *twelve miles* from the State House,	47, 48
City and town population contrasted,	48, 49
Population rank of cities and towns,	49-58
Ranges of population,	57, 58
Total number of cities and towns, January 1, 1896,	58
New cities and towns since 1885,	58
Estimated population to 1905,	58
Comparisons of population in classified industrial districts,	58-62
Textiles,	59, 60
Boots and Shoes,	60
Metals and Metallic Goods,	60, 61
Leather,	61
Paper and Paper Goods,	61, 62
Recapitulation: the five groups,	62
Special presentations for the city of Boston,	62-64
By old ward lines (1875-1895),	62, 63
By police divisions,	63
By missionary districts,	63, 64
Comparisons of the male and female population,	64-67
Villages: By Towns,	69-84
Explanation of presentation,	71

Page

VILLAGES, SECTIONS, ETC.: ALPHABETICALLY, ... 85-124
Explanation of presentation, ... 87

TABULAR ANALYSES, ... 125-128
Definitions of "village" and "section," 125
Population of villages, ... 125
Letter submitted to town and city clerks, ... 125
Letter sent to postmasters, ... 126
Designation of railway stations and post offices, ... 126
Number of cities and towns, villages, and localities with "popular designations:" by counties, and for the State, ... 126
Post offices comprised in the Boston postal district, ... 127
Sub-stations within the Boston postal district, ... 127

CENSUSES OF POPULATION: 1765-1895. DATES OF INCORPORATION, CHANGES IN NAME, AREA, BOUNDARIES, POPULATION, ETC., FOR COUNTIES, CITIES, TOWNS, AND THE STATE, ... 129-216
Explanation of presentation, ... 131
County of Barnstable, ... 133
Towns in the county of Barnstable, ... 133-136
County of Berkshire, ... 136, 137
Cities and towns in the county of Berkshire, ... 137-144
County of Bristol, ... 144
Cities and towns in the county of Bristol, ... 144-149
County of Dukes County, ... 149
Towns in the county of Dukes County, ... 149, 150
County of Essex, ... 150, 151
Cities and towns in the county of Essex, ... 151-158
County of Franklin, ... 158
Towns in the county of Franklin, ... 158-164
County of Hampden, ... 164
Cities and towns in the county of Hampden, ... 164-169
County of Hampshire, ... 169
Cities and towns in the county of Hampshire, ... 169-174
County of Middlesex, ... 174, 175
Cities and towns in the county of Middlesex, ... 175-187
County of Nantucket, ... 187
Town of Nantucket, ... 187
County of Norfolk, ... 187
Cities and towns in the county of Norfolk, ... 188-193
County of Plymouth, ... 193
Cities and towns in the county of Plymouth, ... 193-199
County of Suffolk, ... 199
Cities and towns in the county of Suffolk, ... 199-202
Brighton, ... 200
Charlestown, ... 200
Dorchester, ... 200, 201
Roxbury, ... 201
West Roxbury, ... 201
County of Worcester, ... 202
Cities and towns in the county of Worcester, ... 202-215
The State, ... 216

TABULAR ANALYSIS, ... 217-224
Growth of the towns and cities from the earliest years, ... 217
Historical features and statistical information, ... 217
Increases or decreases as compared with preceding Census, ... 217
Establishment or incorporation of cities and towns, ... 217
Authorities consulted, ... 217
Instances where no authentic knowledge exists, ... 217, 218
Cities and towns of whose incorporation no record exists, ... 218
Authority for dates and quotations given for purposes of reference, ... 218

TABULAR ANALYSIS — Con.
Percentages of increase or decrease in population, by Census periods, for the State and Counties (1765-1895), ... Page 218, 219
Growth of Boston (1638-1895), ... 219-223
Boston, including annexations, ... 220

TABULAR ANALYSES — CON. Page

Comparisons between the Censuses of 1885 and 1895, ... 320
Comparisons between the counties (Census of 1895), ... 320
Comparisons between the cities (Census of 1895), ... 320, 321
Political condition of the population: by sex, ... 321–323
Male population 20 years of age and over (political condition of), ... 321
Total population (political condition of), ... 321, 322
Comparisons between the Censuses of 1875, 1885, and 1895, ... 322, 323
Comparisons between the cities, ... 322, 323
Ratable polls, native born voters, foreign born naturalized voters, aliens, persons having "no political condition," and male population 20 years of age and over: by age periods (for the cities), ... 324–329
Percentages for the city of Boston and for the State, ... 329

FAMILIES: NUMBER AND AVERAGE SIZE, ... 331–338
Recapitulation. The State and Counties, ... 337

SIZE OF FAMILIES AND COMPOSITION BY SEX, ... 339–443
Explanatory notes, ... 341
Size of Families. For Towns, ... 343–386
Towns in the county of Barnstable, ... 343, 344
Towns in the county of Berkshire, ... 344–348
Towns in the county of Bristol, ... 348–350
Towns in the county of Dukes, ... 350, 351
Towns in the county of Essex, ... 351–355
Towns in the county of Franklin, ... 355–358
Towns in the county of Hampden, ... 358–361
Towns in the county of Hampshire, ... 361–363
Towns in the county of Middlesex, ... 363–370
Towns in the county of Nantucket, ... 370
Towns in the county of Norfolk, ... 370–374
Towns in the county of Plymouth, ... 374–377
Towns in the county of Suffolk, ... 377, 378
Towns in the county of Worcester, ... 378–386
Size of Families and Composition by Sex. For Cities, ... 387–426
Cities in the county of Berkshire, ... 387, 388
Cities in the county of Bristol, ... 389–392
Cities in the county of Essex, ... 392–401
Cities in the county of Hampden, ... 401–405
Cities in the county of Hampshire, ... 405, 406
Cities in the county of Middlesex, ... 406–417
Cities in the county of Norfolk, ... 417, 418
Cities in the county of Plymouth, ... 418, 419
Cities in the county of Suffolk, ... 419–424
Cities in the county of Worcester, ... 424–426
Size of Families and Composition by Sex. For the State, ... 427–435
Recapitulation. Size of Families, ... 436–443

TABULAR ANALYSES, ... 444–456
Average size of family; 1875, 1885, 1895, ... 444
"Census family;" interpretation of the term, ... 444
Classification of "families" by the Census method, ... 444, 445
Population of large families in towns, ... 445–448
Size of families in the cities, the towns, and the State, with percentages of total families and total population, ... 448–453
Families composed of one sex only, ... 453–455

ROOMS: OCCUPIED DWELLING HOUSES, ... 457–558
Size of family, total number of rooms occupied by all families of specified size, average number of rooms occupied by each family of specified size, and average number of persons to a room in each family of specified size, in the towns and cities (by wards) of each county, ... 459–555
County of Barnstable, ... 459, 460
County of Berkshire, ... 460–466
County of Bristol, ... 466–473

ROOMS: OCCUPIED DWELLING HOUSES — Con.
Size of family, total number of rooms occupied, etc. — Con. Page
County of Dukes, ... 473
County of Essex, ... 473-489
County of Franklin, ... 489-492
County of Hampden, ... 492-499
County of Hampshire, ... 499-504
County of Middlesex, ... 504-524
County of Nantucket, ... 524
County of Norfolk, ... 525-530
County of Plymouth, ... 530-535
County of Suffolk, ... 535-543
County of Worcester, ... 543-555
Recapitulation. For the State, ... 556, 557

ROOMS: OCCUPIED AND UNOCCUPIED DWELLING HOUSES, ... 559-572
Occupied and unoccupied rooms in occupied dwelling houses, rooms in unoccupied dwelling houses, and total number of rooms in occupied and unoccupied dwelling houses, in the towns and cities (by wards) of each county, ... 561-572
Recapitulation. For the State and Counties, ... 572

TENEMENTS: OCCUPIED DWELLING HOUSES, ... 573-638
Number of occupied dwelling houses, number of families and occupied tenements in occupied dwelling houses, number of occupied and unoccupied tenements in occupied dwelling houses, and total number of tenements in occupied dwelling houses, in the towns and cities (by wards) of each county, ... 575-636
County of Barnstable, ... 575, 576
County of Berkshire, ... 576-579
County of Bristol, ... 579-584
County of Dukes, ... 584
County of Essex, ... 584-593
County of Franklin, ... 593-595
County of Hampden, ... 595-600
County of Hampshire, ... 601-603
County of Middlesex, ... 603-615
County of Nantucket, ... 615
County of Norfolk, ... 615-618
County of Plymouth, ... 618-621
County of Suffolk, ... 621-628
County of Worcester, ... 628-636
Recapitulation. For the State, ... 637

DWELLING HOUSES: NUMBER OF STORIES AND MATERIALS, ... 639-741
Number of occupied dwelling houses, number of unoccupied dwelling houses, total number of dwelling houses, with the number of stories to dwelling houses, and materials of which constructed, in the towns and cities (by wards) of each county, . . . 641-738
County of Barnstable, ... 641, 642
County of Berkshire, ... 642-648
County of Bristol, ... 648-656
County of Dukes, ... 656, 657
County of Essex, ... 657-671
County of Franklin, ... 671-674
County of Hampden, ... 674-681
County of Hampshire, ... 681-686
County of Middlesex, ... 686-706
County of Nantucket, ... 706
County of Norfolk, ... 706-711
County of Plymouth, ... 711-716
County of Suffolk, ... 716-725
County of Worcester, ... 725-738
Recapitulation. For the State, ... 738-741

TABULAR ANALYSES, ... 742-754
Housing of the people, ... 742
Distribution of the population by rooms, ... 742

TABULAR ANALYSES — Con. Page

Concentration and undue crowding of population, ... 742
Comparisons of density of population, ... 742
Consideration of concentration on the basis of "rooms," 742, 743
Average number of persons to a room. For the State and Counties, ... 743
Average number of persons to a room. For the Cities, ... 743, 744
City and town population compared with respect to occupancy of rooms, ... 744, 745
Rooms: occupied and unoccupied dwelling houses, ... 745, 746
In the cities, ... 745, 746
Cities and towns compared, ... 746
Tenements: occupied dwelling houses, ... 746-749
The State and Counties, ... 747
In the cities, ... 747-749
Cities and towns compared, ... 749
Dwelling houses: number of stories and materials, ... 749-753
Number of stories, ... 749, 750
Materials of which constructed: comparisons for the State, cities, and towns, between 1885 and 1895, ... 750, 751
Occupied and unoccupied dwelling houses: comparisons for the State, counties, and cities, between 1885 and 1895, ... 751-753
Cities and towns compared for 1885 and 1895, ... 753

AVERAGES AND COMPARATIVE TOTALS: ROOMS, TENEMENTS, AND DWELLING HOUSES, . 755-782
Comparative Totals. Population by sex; number of families; occupied, unoccupied, and total dwelling houses; occupied, unoccupied, and total tenements in occupied dwelling houses; occupied, unoccupied, and total rooms in occupied and unoccupied dwelling houses: by counties, cities (by wards), and towns, ... 756-779
Averages, etc. Males to a family, females to a family, and persons to a family; persons to an occupied dwelling house; estimated population of unoccupied dwelling houses; estimated population of unoccupied tenements in occupied dwelling houses; estimated population if all dwelling houses were fully occupied; families to each occupied dwelling house; persons to each occupied tenement; rooms to each occupied tenement; and persons to each room in occupied tenements, by counties, cities (by wards), and towns, ... 756-779
Recapitulation. For the State and Counties, ... 780, 781
Recapitulation. *Averages per Areas.* Areas (square miles); persons to a square mile; families to a square mile; dwellings to a square mile; acres to a person; acres to a family; acres to a dwelling; square feet to a person; square feet to a family; and square feet to a dwelling. For the State and Counties, ... 780, 781

TABULAR ANALYSIS, ... 783-790
Estimates based upon ascertained facts, ... 783
General comparisons of totals and averages, ... 783
County comparisons, ... 783, 784
Estimated population. The State and Counties, ... 784
Percentages of possible increase, ... 784
Comparisons of Massachusetts cities, ... 784, 785
Comparisons with leading cities in the United States, ... 785-787
Comparisons with the States and Territories of the United States, ... 787, 788
Averages per areas, ... 788, 789
County averages, ... 789
State averages; 1885 and 1895, ... 789
Effect of the increase of population upon a territory incapable of expansion, . . 789
Area available to each person constantly growing smaller, ... 789
Decrease quite material, when measured at intervals of ten years, ... 789

NATIVE AND FOREIGN BORN, ... 791-804
Recapitulation. By Counties, ... 803
Recapitulation. For the State, ... 803
Recapitulation. Percentages: by Sex. For the State and Counties, ... 803

COLOR AND RACE, ... 805-828

Definition of "widowed," 865
County comparisons, ... 865
Soldiers, sailors, and marines, ... 865
Number of soldiers, sailors, and marines, survivors of the War of the Rebellion, living in the Commonwealth on May 1, 1895, ... 865
Duplications in designation avoided, ... 865
Possible errors and omissions, ... 865
Figures approximate rather than absolute, ... 865

THE

DECENNIAL CENSUS OF THE COMMONWEALTH.

1895.

VOLUME I.

INTRODUCTION.

The Decennial Census taken in 1895 was the fifth regular decennial enumeration of the people, conducted in accordance with the Constitution and laws made in conformity thereto. The enumeration of the population and the collection of social statistics began May 1. By the provisions of the Census law, however, the collection of information relating to other branches of the work, chiefly Manufactures, Agriculture, Commerce, and the Fisheries, was not undertaken until a later date, or until the industrial operations of the entire year 1895 had been completed; so that in the main, the industrial and commercial returns of the Census will cover the year ending December 31, 1895.

Although the first decennial enumeration was made in 1855, there were several previous enumerations, by order of the Legislature, the first occurring in 1837, and others following in 1840 and 1850. In connection with the Censuses taken decennially by the United States beginning with 1790, and the earlier provincial Censuses taken in 1765 and 1776, we are able to trace the growth of the Commonwealth during 130 years. Industrial statistics, including statistics of Agriculture, were collected in the Census of 1837, also in 1845, and regularly in connection with the decennial enumerations begun in 1855.

The results of the Census of 1885 were nominally published in three volumes, but, as one of these consisted of two Parts, four books were actually issued, aggregating 4,493 pages of tabular matter, accompanied

by analytical text. The results of the present Census, while requiring in their presentation approximately the same number of pages, will be published in smaller volumes, probably eight in number, which will be more conveniently consulted by the reader.

Each separate section of the work, as fast as completed, is issued in preliminary pamphlet form, intended mainly for the press, in order that the information may reach the public at the earliest possible moment. In accordance with this plan, the matter contained in the five Parts comprising the present volume, has been published seriatim, at dates much earlier than would have been possible under the plan formerly followed of issuing practically nothing until the bound volumes were ready. A full statement of the organization and methods of the Census will be given in the final volume, and for that reason will not be otherwise referred to here.

The present volume, the first of the series, contains the following:

Part 1.
- Population and Legal Voters.
- Population: By Towns, Alphabetically.
- Population for 1885 and 1895: Increase and Decrease. By Towns.
- Population and Sex.
- Population for 1885 and 1895: Increase and Decrease. By Sex.

Part 2.
- Villages: By Towns.
- Villages, Sections, Etc.: Alphabetically.
- Censuses of Population: 1765–1895. Dates of Incorporation, Changes in Name, Area, Boundaries, Population, Etc., for Counties, Cities, Towns, and The State.

Part 3.
- Polls and Voters.
- Political Condition: By Sex.
- Political Condition: By Age Periods.

Part 4.
- Families; Number and Average Size.
- Size of Families and Composition by Sex.
- Rooms: Occupied Dwelling Houses.
- Rooms: Occupied and Unoccupied Dwelling Houses.
- Tenements: Occupied Dwelling Houses.
- Dwelling Houses: Number of Stories and Materials.
- Averages and Comparative Totals: Rooms, Tenements, and Dwelling Houses.

Part 5.
Native and Foreign Born.
Color and Race.
Conjugal Condition.
Soldiers, Sailors, and Marines.

Each tabular presentation is accompanied with full analytical text, to which the attention of the reader is especially called.

HORACE G. WADLIN,
Chief.

Bureau of Statistics of Labor,
20 Beacon Street, Boston,
December, 1896.

† [Of the total decrease in population since 1885, or 29,426 for 143 towns, 6,867, or 23.34 per cent, is directly due to loss of territory caused by the division of existing towns and the incorporation of new towns, as follows: — Attleborough loses 4,887 to North Attleborough; Tisbury, 539 to West Tisbury; Longmeadow, 1,057 to East Longmeadow; Milford, 384 to Hopedale. If the towns named had remained intact all but Tisbury would have shown an increase in population, representing in the aggregate 3,216, or 13.29 per cent, over their population in 1885, while Tisbury would have shown a decrease in population of 79, or 5.13 per cent. Assuming then, that, with the exception of Tisbury, the entire loss in these towns is apparent only, the actual decrease in population for 140 towns is found to be 22,559, or 11.33 per cent, of their population in 1885. Although Avon was set off from the town of Stoughton, the latter town not only regained the population lost by the division, but gained 99 more in total population.]

Tabular Analyses

For the Following Presentations:

	Pages
Population and Legal Voters,	1-8
Population: By Towns, Alphabetically,	9-14
Population for 1885 and 1895: Increase and Decrease. By Towns,	15-24
Population and Sex,	25-32
Population for 1885 and 1895: Increase and Decrease. By Sex,	33-42

The presentation, pages 1 to 8, shows the population of the cities and towns, together with the number of legal voters, with a recapitulation by counties and for the State. The total population of the State is 2,500,183, and the total number of legal voters, 560,802. It should be said that in the enumeration taken by the Census the term "legal voters" means persons who have the constitutional requisites for voting, and such persons are to be distinguished from registered voters or persons who have not only the constitutional requisites, but have complied with certain regulations under which the constitutional right is to be exercised, such as, for instance, registration. In other words, legal voters, as enumerated in the Census, are potential voters, or those who might vote if all merely temporary disabilities which it is in the power of the voter himself to overcome were removed. The number of such voters enumerated in the Census of 1885 was 442,616, or 22.79 per cent of the entire population; the legal voters enumerated in 1895 constituted 22.43 per cent of the population. There were 118,186 more voters in 1895 than in 1885, or an increase of 26.70 per cent.

The presentation, pages 9 to 14, shows the population by towns, arranged alphabetically. The presentation, pages 15 to 19, exhibits the towns showing an increase in population from 1885 to 1895, while this is followed upon pages 20 to 22 by a presentation of the towns showing a decrease. The recapitulation, page 23, will enable the reader to see at a glance the number of towns showing a gain and the number showing a loss, with the net gain or loss since 1885, with net percentages of increase or decrease. The actual numerical net gain since 1885 for the whole State is 558,042, the actual net percentage of increase being 28.73. There are 210 towns which show an increase in population, while 143 towns show a loss. The largest number of towns showing increase in any single county is found in the county of Middlesex, namely, 41; while on the other hand, 13 towns in this county show a loss. The net percentage of increase for the county is, however, 39.71, a larger percentage of gain than is found in any other county. The county of Nantucket shows a net loss of 126 persons, or a percentage of decrease of 4.01. The county of Barnstable contains nine towns which show a net loss numerically of 2,191, or a net percentage of decrease of 7.34. Every county except Barnstable and Nantucket shows a net percentage of increase, the highest percentage being found in Middlesex, as just cited, and the lowest in the county of Dukes, namely, 2.49. The county having the largest number of towns showing a loss is Berkshire, which contains 24 such towns; but this county, nevertheless, makes a net gain of 12,464 persons, and a net percentage of increase of 16.88. Worcester County contains 22 towns which show a loss, against 37 towns which show a gain, the numerical net gain for the county being 62,406, and the net percentage of increase, 25.57. In 1885, there were 153

towns which exhibited a loss, as compared with the year 1875, the actual loss in these towns between 1875 and 1885 being 34,675. The present Census, therefore, shows a less number of towns which have suffered a loss in population during the preceding decade than was found in 1885, and the actual numerical decrease in these towns is but 29,426, a percentage of decrease of 13.08, as against 34,675, the loss in actual population between 1875 and 1885, which was a percentage of decrease for the decade of 13.10 While, therefore, the number of towns showing a loss is less in the present Census than in that of 1885, and the numerical loss is also less, the percentage of loss in the towns which have declined is substantially the same as the percentage of loss in such towns shown in the Census taken ten years ago.

In 1885, the counties of Barnstable and Nantucket showed a net loss, the actual numerical decline, between 1875 and 1885, in these counties taken together being 2,358. The same counties show, as will be seen from the figures just cited, a further decline between 1885 and 1895 of 2,317. Barnstable County lost 7.15 per cent of its population between 1875 and 1885; it has also lost 7.34 per cent of its population between 1885 and 1895. Nantucket County lost 1.84 per cent of its population between 1875 and 1885, and now exhibits a further decline of 4.01 per cent. Notwithstanding the losses exhibited in the tables in certain portions of the State, the actual net percentage of increase is, as we have said, 28.73 per cent, while the actual net percentage of increase between 1875 and 1885 was only 17.57 per cent. The towns which show a decline are mainly the small and remote agricultural towns, such, for instance, as are found in some parts of Berkshire, Franklin, and Worcester counties, or the shore towns, whose main reliance is the fishing industry. Towns of this class have suffered a loss for many years, the general tendency of the population being toward the larger cities and towns.

Towns Showing Continuous Loss for 20 Years.

The following table shows the towns which have suffered a continuous loss in population during twenty years:

Adams,*	Eastham,*	Middlefield,
Alford,	Edgartown,*	Middleton,

Concentration of Population.

The tendency exhibited in previous censuses toward concentration of the population in the vicinity of the city of Boston still continues. The following table shows the

* See note on page 44.

† The loss in 1885 was either wholly or partly due to a change in territory during the previous decade.

population in municipalities located within a circle including eight miles in every direction from the State House, so presented as to show the gain for each city and town between 1885 and 1895:

Cities and Towns.	Population		Gain
	1885	1895	
Boston,	390,393	496,920	106,527
Cambridge,	59,658	81,643	21,985
Chelsea,	25,709	31,264	5,555
Everett,	5,825	18,573	12,748
Malden,	16,407	29,708	13,301
Medford,	9,042	14,474	5,432
Somerville,	29,971	52,200	22,229
Arlington,	4,673	6,515	1,842
Belmont,	1,639	2,843	1,204
Brookline,	9,196	16,164	6,968
Melrose,	6,101	11,965	5,864
Revere,	3,637	7,423	3,786
Watertown,	6,238	7,788	1,550
Winchester,	4,390	6,150	1,760
Winthrop,	1,370	4,192	2,822
Totals,	574,249	787,822	213,573

The above table shows that 787,822 persons, or 31.51 per cent of the entire population of the State, resided in the immediate vicinity of the city of Boston, in 1895. The same towns and cities contained in 1885, 574,249, or 29.57 per cent of the population of the State; the gain upon this territory since 1885 has been 213,573, or 37.19 per cent.

If the population is desired of the cities and towns within ten miles of the State House the following should be included in addition to those shown in the preceding table:

Cities and Towns.	Population		Gain
	1885	1895	
Dedham,	6,641	7,211	570
Hyde Park,	8,376	11,826	3,450
Lexington,	2,718	3,498	780
Lynn,	45,867	62,354	16,487
Milton,	3,555	5,518	1,963
Nahant,	637	865	228
Needham,	2,586	3,511	925
Newton,	19,759	27,590	7,831
Quincy,	12,145	20,712	8,567
Saugus,	2,855	4,497	1,642
Stoneham,	5,659	6,284	625
Swampscott,	2,471	3,259	788
Wakefield,	6,060	8,304	2,244
Waltham,	14,609	20,876	6,267
Woburn,	11,750	14,178	2,428
Totals,	145,688	200,483	54,795

The cities and towns shown in these two tables are included in the so-called Metropolitan district, or "Greater Boston," as that term is usually employed, or has been fixed by various commissions which have considered subjects relating to the city of Boston and its immediate suburbs The total population for 1895 of the cities and towns within this area is 988,305, and the municipalities thus united include all whose nearest boundary is within ten miles of the State House, except the town of Wellesley which at one point extends over the ten-mile line, and including also the town of Swampscott which lies just outside the ten-mile line. The Metropolitan District Commission which reported to the Legislature of 1896 respecting the subject of a general municipal administration for the city of Boston and adjoining municipalities, included all of these cities and towns, except Needham, in its plan for the creation of a new Metropolitan county.

If the circle be enlarged to comprise the cities and towns within 12 miles of the State House, the following table results:

Cities and Towns.	Population		Gain
	1885	1895	
Boston,	390,393	496,920	106,527
Cambridge,	59,658	81,643	21,985
Chelsea,	25,709	31,264	5,555
Everett,	5,825	18,573	12,748
Lynn,	45,867	62,354	16,487
Malden,	16,407	29,708	13,301
Medford,	9,042	14,474	5,432
Newton,	19,759	27,590	7,831
Quincy,	12,145	20,712	8,567
Somerville,	29,971	52,200	22,229
Waltham,	14,609	20,876	6,267
Woburn,	11,750	14,178	2,428
Arlington,	4,673	6,515	1,842
Belmont,	1,639	2,843	1,204
Braintree,	4,040	5,311	1,271
Brookline,	9,196	16,164	6,968
Dedham,	6,641	7,211	570
Hull,	451	1,044	593
Hyde Park,	8,376	11,826	3,450

Lynnfield,	766	818	52
Melrose,	6,101	11,965	5,864
Milton,	3,555	5,518	1,963
Nahant,	637	865	228
Needham,	2,586	3,511	925
Reading,	3,539	4,717	1,178
Revere,	3,637	7,423	3,786
Saugus,	2,855	4,497	1,642
Stoneham,	5,659	6,284	625
Swampscott,	2,471	3,259	788
Wakefield,	6,060	8,304	2,244
Watertown,	6,238	7,788	1,550
Wellesley,	3,013	4,229	1,216
Winchester,	4,390	6,150	1,760
Winthrop,	1,370	4,192	2,822
Totals,	731,746	1,004,424	272,678

The cities and towns within the twelve-mile circle had, in 1885, a population of 731,746, or 37.68 per cent of the entire population of the State. The population upon this territory is now 1,004,424, or 40.17 per cent of the population of the State, the gain being 272,678, or 37.26 per cent.

City and Town Population Contrasted.

Since 1885, nine towns have been incorporated as cities, including the town of North Adams, which has been under city government since January, 1896, the act authorizing the change having been passed before the taking of the Census, although the town had not at that time actually become a city. It is, however, included in the following table, which shows the population of the cities incorporated since 1885, with comparisons for the years 1885 and 1895:

Cities.	1885	1895
Beverly,	9,186	11,806
Chicopee,	11,516	16,420
Everett,	5,825	18,573
Marlborough,	10,941	14,977
Medford,	9,042	14,474
North Adams,	12,540	19,135
Pittsfield,	14,466	20,461
Quincy,	12,145	20,712
Woburn,	11,750	14,178
Totals,	97,411	150,736

It will be seen from the foregoing table that these places had a population of 97,411 in 1885, and 150,736 in 1895, the rate of increase being 54.74 per cent. The Commonwealth now has 32 cities, including North Adams. The population of these cities, with the numerical gain and percentage of increase since 1885, is shown in the following table, the names of cities which have been incorporated since 1885 being printed in italics:

Cities.	Population		Increase	
	1885	1895	Number	Percentages
Beverly,	9,186	11,806	2,620	28.52
Boston,	390,393	496,920	106,527	27.29
Brockton,	20,783	33,165	12,382	59.58
Cambridge,	59,658	81,643	21,985	36.85
Chelsea,	25,709	31,264	5,555	21.61
Chicopee,	11,516	16,420	4,904	42.58
Everett,	5,825	18,573	12,748	218.85
Fall River,	56,870	89,203	32,333	56.85
Fitchburg,	15,375	26,409	11,034	71.77
Gloucester,	21,703	28,211	6,508	29.99
Haverhill,	21,795	30,209	8,414	38.61
Holyoke,	27,895	40,322	12,427	44.55
Lawrence,	38,862	52,164	13,302	34.23
Lowell,	64,107	84,367	20,260	31.60
Lynn,	45,867	62,354	16,487	35.95

Cities.	Population		Increase	
	1885	1895	Number	Percentages
Malden,	16,407	29,708	13,301	81.07
Marlborough,	10,941	14,977	4,036	36.89
Medford,	9,042	14,474	5,432	60.08
New Bedford,	33,393	55,251	21,858	65.46
Newburyport,	13,716	14,552	836	6.10
Newton,	19,759	27,590	7,831	39.63
North Adams,	12,540	19,135	6,595	52.59
Northampton,	12,896	16,746	3,850	29.85
Pittsfield,	14,466	20,461	5,995	41.44
Quincy,	12,145	20,712	8,567	70.54
Salem,	28,090	34,473	6,383	22.72
Somerville,	29,971	52,200	22,229	74.17
Springfield,	37,575	51,522	13,947	37.12
Taunton,	23,674	27,115	3,441	14.53
Waltham,	14,609	20,876	6,267	42.90
Woburn,	11,750	14,178	2,428	20.66
Worcester,	68,389	98,767	30,378	44.42
Totals,	1,184,907	1,635,767	450,860	38.05

From this table we note that the population under city government is now 1,635,767, or 65.43 per cent of the total population. Upon the same territory in 1885 there was a population of 1,184,907, or 61.01 per cent of the total population, the numerical increase being 450,860, or 38.05 per cent. The towns outside the territorial limits of these cities contained in 1885 a population of 757,234, or 38.99 per cent of the total population, which has risen to 864,416, or 34.57 per cent of the total population, a gain of but 14.15 per cent. That is to say, upon the territory now under city government there has been a gain of 38.05 per cent in ten years, while the gain in the towns outside these municipal limits has been but 14.15 per cent in the same time. Marked differences in the rate of growth during the decade appear in the different municipalities. The city which has made the largest percentage of growth is Everett, incorporated as a city in 1892, and showing an increase of 218.85 per cent. This rate is, of course, entirely unusual, and due to the rapid development of a residence section within easy distance of the city of Boston. The rate of increase in Boston itself is 27.29 per cent, but this has been secured without annexation. The cities of Malden, Medford, Somerville, and Quincy also show great gains, due to the development of suburban residential sections, the percentages of increase being respectively, 81.07, 60.08, 74.17, and 70.54. The city which, remote from the vicinity of Boston, shows the largest percentage of growth during the decade is Fitchburg, in Worcester County, this percentage being 71.77. Other cities which show an increase greater than 50 per cent are Brockton, 59.58; Fall River, 56.85; New Bedford, 65.46; and North Adams, 52.59. It will be noted that the percentage rate of increase in the municipalities now under city government since 1885 is 38.05, while the percentage rate of increase in the State at large has been but 28.73.

Population Rank of Cities and Towns.

The following table exhibits the ranking, upon the basis of population, of all the cities and towns in the Commonwealth, the names of cities being printed in small capitals:

Cities and Towns.	Counties	Population	Rank in 1885	Rank in 1895
Boston,	Suffolk,	496,920	1	1
Worcester,	Worcester,	98,767	2	2
Fall River,	Bristol,	89,203	5	3
Lowell,	Middlesex,	84,367	3	4
Cambridge,	Middlesex,	81,643	4	5
Lynn,	Essex,	62,354	6	6
New Bedford,	Bristol,	55,251	9	7
Somerville,	Middlesex,	52,200	10	8
Lawrence,	Essex,	52,164	7	9
Springfield,	Hampden,	51,522	8	10
Holyoke,	Hampden,	40,322	12	11

An inspection of the foregoing table shows that 27 of the cities rank in numerical order, the city of Boston standing first, and the city of Chicopee ranking 27. The town of Brook-

line, containing a population of 16,164, ranks next to the city of Chicopee, and stands 28 in the table. After Brookline, rank in regular order the cities of Marlborough, Newburyport, Medford, and Woburn. Woburn is followed by the towns of Melrose and Hyde Park, ranking respectively 33 and 34, and the city of Beverly ranking 35. The population of Beverly, as determined by the Census, was 11,806, just within the limit required for incorporation as a city. It should be said, however, that Beverly, being a shore town, has an increase of population during the summer months, and, prior to its incorporation as a city, the results of a special census, taken during the summer, showed that it had a sufficient population. The Decennial Census was taken earlier in the year however, and at a time when a depression in the boot and shoe industry undoubtedly affected results.

The smallest town in the State is New Ashford, in Berkshire County, its population being but 116, and its rank among the cities and towns, 353. Gosnold, in Dukes County, ranked as the smallest town in 1885, its population at that time being 122; the town has made a gain of 18 persons in 10 years and thereby changed its rank.

The following table is a summary showing the number of cities and towns within certain ranges of population, the total population and average population for each range, and percentages for each range of the whole number of towns, and of the total population:

Range of Population.	Number of Cities and Towns	Total Population	Average Population	Percentages — Of Towns	Percentages — Of Population
Boston,	1	496,920	496,920	0.28	19.88
90,000 to 100,000,	1	98,767	98,767	0.28	3.95
80,000 to 90,000,	3	255,213	85,071	0.85	10.21
60,000 to 70,000,	1	62,354	62,354	0 28	2.49
50,000 to 60,000,	4	211,137	52,784	1.13	8.45
40,000 to 50,000,	1	40,322	40,322	0.28	1.61
30,000 to 40,000,	4	129,111	32,278	1.13	5.17
20,000 to 30,000,	8	201,082	25,135	2.27	8.04
15,000 to 20,000,	5	87,038	17,408	1.42	3.48
10,000 to 15,000,	11	137,736	12,521	3.12	5.51
5,000 to 10,000,	46	314,841	6,844	13.03	12.59
3,000 to 5,000,	46	181,297	3,941	13.03	7.25
2,500 to 3,000,	18	49,491	2,750	5.10	1.98
2,000 to 2,500,	23	51,064	2,220	6.52	2.04
1,500 to 2,000,	39	67,476	1,730	11.05	2.70
1,000 to 1,500,	47	57,243	1,218	13.32	2.29
500 to 1,000,	59	45,804	776	16.71	1.83
Under 500,	36	13,287	369	10.20	0.53
Totals,	353	2,500,183	7,083	100.00	100.00

The city of Boston, containing a population of 496,920, stands alone in its class, and contains 19.88 per cent of the total population of the State. Outside of the city of Boston there is no city containing more than 100,000 persons. In the class ranging from 90,000 to 100,000 is found the city of Worcester, containing 3.95 per cent of the total population of the State. In the class ranging from 80,000 to 90,000 are found three cities, the total population therein contained being 10.21 per cent of the total population of the State. There are no cities in which the population ranges from 70,000 to 80,000. In the class ranging from 60,000 to 70,000 there is one city, its population being 2.49 per cent of the entire population of the State. There are four cities in which the population ranges from 50,000 to 60,000; one in the class ranging from 40,000 to 50,000; four, ranging from 30,000 to 40,000; eight, ranging from 20,000 to 30,000; and five cities and towns

in which the population ranges from 15,000 to 20,000. In the class ranging from 10,000 to 15,000 are found 11 cities and towns. The classes to which we have so far referred, namely, those ranging from 10,000 to 100,000, together with the city of Boston, represent 11.04 per cent of the total number of cities and towns in the Commonwealth, and contain 68.79 per cent of the entire population At the other end of the scale, there are found 36 towns having a population under 500; 59 ranging from 500 to 1,000; 47, from 1,000 to 1,500; 39, from 1,500 to 2,000; 23, from 2,000 to 2,500; 18, from 2,500 to 3,000; 46, from 3,000 to 5,000; and 46, from 5,000 to 10,000. These towns taken together constitute 88.96 per cent of the total number of the cities and towns, while they contain 31.21 per cent of the entire population of the State.

The total number of cities and towns January 1, 1896, was 353, of which, as we have said, 32 were cities and 321 were towns. In 1885 there were 23 cities and 325 towns, making a total of 348 cities and towns. The newly incorporated cities have been mentioned. The new towns since 1885 are North Attleborough, in Bristol County, set off from Attleborough, June 14, 1887; West Tisbury, in Dukes County, set off from the town of Tisbury, April 28, 1892; East Longmeadow, in Hampden County, set off from the town of Longmeadow, July 1, 1894; Avon, in Norfolk County, which was set off from the town of Stoughton, February 21, 1888, and afterwards received additional territory from the towns of Holbrook and Randolph; and Hopedale, in Worcester County, which was set off from the town of Milford, April 7, 1886. In a subsequent presentation we shall give full information as to the dates of incorporation, changes in name and boundaries, population, etc., of the counties, cities, and towns.

Estimated Population to 1905.

To enable calculations of population to be readily made for years between the census periods, the following table is inserted, containing an estimate for all years between 1895 and 1905. The figures contained in this table are estimated upon a purely mathematical basis, except for the year 1895, which is, of course, the census year.

Years.	Population	Years.	Population
1895,	2,500,183	1901,	2,962,812
1896,	2,571,938	1902,	3,047,845
1897,	2,645,753	1903,	3,135,318
1898,	2,721,686	1904,	3,225,302
1899,	2,799,798	1905,	3,317,868
1900,	2,880,152		

Comparisons of Population in Classified Industrial Districts.

Chief among the causes which have led to the increase in population of the State is the growth and prosperity of our manufacturing industries.

In the Decennial Census of 1885 it was found that, exclusive of the city of Boston, there were 100 cities and towns leading in manufacturing, each showing a product exceeding one million dollars in value for the Census year. These 100 cities and towns contained 59.24 per cent of the population of the State, and for the last decade they exhibit an increase of 34.60 per cent, a rate of increase relatively greater than that shown in other municipalities, inasmuch as the growth shown in all other cities and towns taken together, including the city of Boston, is at the rate of 20.20 per cent. As these 100 cities and towns include the suburban cities near Boston it is, of course, true that part of their growth is due to causes other than their prominence in manufacturing, as in fact they share in the prosperity of the metropolis. Broadly considered, however, it remains true that to manufacturing the growth of these 100 municipalities is largely due.

The leading industries of the State include Textiles, Boots and Shoes, Metals and Metallic Goods, Leather, and Paper and Paper Goods. Under these designations about 50 per cent of the total product of the State is found. If, under these industry heads, we classify the cities and towns, placing each in the class representing the principal industry of the city or town, on the basis of persons employed in 1885, and include no municipality in which the product in the specified industry for that year did not reach $300,000 in value, we arrive at certain results which are interesting as showing the growth of the leading industrial cities and towns.

Under the classification "Textiles" we group the following, comparing their population for 1885 and 1895:

Cities and Towns.	Population		Increase (+), or Decrease (−), in 1895 as compared with 1885	
	1885	1895	Number	Percentages
Adams,	8,283	7,837	−446	−5.38

North Adams,	12,540	19,135	+6,595	+52.59
Northbridge,	3,786	5,280	+1,494	+39.46
Palmer,	5,923	6,858	+935	+15.79
Pittsfield,	14,466	20,461	+5,995	+41.44
Saugus,	2,855	4,497	+1,642	+57.51
Southbridge,	6,500	8,250	+1,750	+26.92
Sutton,	3,101	3,420	+319	+10.29
Taunton,	23,674	27,115	+3,441	+14.53
Uxbridge,	2,948	3,546	+598	+20.28
Walpole,	2,443	2,994	+551	+22.55
Ware,	6,003	7,651	+1,648	+27.45
Warren,	4,032	4,430	+398	+9.87
Watertown,	6,238	7,788	+1,550	+24.85
Webster,	6,220	7,799	+1,579	+25.39
West Boylston,	2,927	2,968	+41	+1.40
Westford,	2,193	2,418	+225	+10.26
Totals,	411,073	562,152	+151,079	+36.75

The population of these textile cities and towns in 1885 was 411,073. It has now become 562,152, a gain of 36.75 per cent.

The Boot and Shoe cities and towns appear in the following table:

Cities and Towns.	Population		Increase (+) or Decrease (−), in 1895 as compared with 1885	
	1885	1895	Number	Percentages
Abington,	3,699	4,207	+508	+13.73
Ashland,	2,633	2,090	−543	−20.62

Hudson,	3,968	5,308	+1,340	+33.77
Lynn,	45,867	62,354	+16,487	+35.95
Marblehead,	7,517	7,671	+154	+2.05
Marlborough,	10,941	14,977	+4,036	+36.89
Medway,	2,777	2,913	+136	+4.90
Milford,	9,343	8,959	−384	−4.11
Natick,	8,460	8,814	+354	+4.18
Newburyport,	13,716	14,552	+836	+6.10
North Brookfield,	4,201	4,635	+434	+10 33
Pepperell,	2,587	3,321	+734	+28.37
Randolph,	3,807	3,694	−113	−2.97
Rockland,	4,785	5,523	+738	+15.42
Rowley,	1,183	1,272	+89	+7.52
Salem,	28,090	34,473	+6,383	+22.72
Spencer,	8,247	7,614	−633	−7.68
Stoneham,	5,659	6,284	+625	+11.04
Stoughton,	5,173	5,272	+99	+1.91
Westborough,	4,880	5,235	+355	+7.27
Weymouth,	10,740	11,291	+551	+5.13
Whitman,	3,595	5,744	+2,149	+59.78
Totals,	275,707	337,155	+61,448	+22 29

The cities and towns grouped in the preceding table contained a population of 275,707 in 1885. This has risen to 337,155, a gain of 22.29 per cent. It will be noticed that while the towns as a whole exhibit growth, nevertheless a decrease appears in certain places. In a subsequent presentation the changes in population due to changes in area or other exceptional causes will be especially pointed out. It is sufficient to note here that some of the decreases appearing in this table may be thus legitimately accounted for, as, for instance, in the town of Milford which lost territory by the incorporation of the town of Hopedale. In other cases a slight depression of the boot and shoe industry at the time the Census of 1895 was taken accounts for the failure to show an increase over the figures for 1885.

The next table presents the cities and towns which lead in the manufacture of metals and metallic goods.

Cities and Towns.	Population		Increase (+), or Decrease (−), in 1895 as compared with 1885	
	1885	1895	Number	Percentages
Attleborough,*	13,175	14,864	+1,689	+12.82
Bridgewater,	3,827	4,686	+859	+22.45
Canton,	4,380	4,636	+256	+5.84
Mansfield,	2,939	3,722	+783	+26.64
Montague,	5,629	6,058	+429	+7.62
Somerset,	2,475	1,983	−492	−19.88
Wareham,	3,254	3,367	+113	+3.47
Worcester,	68,389	98,767	+30,378	+44.42
Totals,	104,068	138,083	+34,015	+32.69

* Including also North Attleborough in 1895.

These towns had a population of 104,068 in 1885 which has risen to 138,083, a gain of 32.69 per cent. Every municipality in the group shows an increase except the town of Somerset which has suffered industrial reverses.

The cities and towns in which the manufacture of leather is the leading industry appear below.

Cities and Towns.	Population		Increase (+), or Decrease (−), in 1895 as compared with 1885	
	1885	1895	Number	Percentages
Peabody,	9,530	10,507	+977	+10.25
Winchester,	4,390	6,150	+1,760	+40.09
Woburn,	11,750	14,178	+2,428	+20.66
Totals,	25,670	30,835	+5,165	+20.12

In these cities and towns the population has risen from 25,670 in 1885 to 30,835, a gain of 20.12 per cent. Growth in each municipality has contributed to this result, although the large percentage shown in Winchester is mainly due to the development of the town as a place of residence, the Leather industry at present being an incidental rather than a prominent factor in the prosperity of the town, which is residential rather than industrial.

The concluding table presents the cities and towns devoted largely to the Paper and Paper Goods industry.

Cities and Towns.	Population		Increase (+), or Decrease (−), in 1895 as compared with 1885	
	1885	1895	Number	Percentages
Dalton,	2,113	3,210	+1,097	+51.92
Holyoke,	27,895	40,322	+12,427	+44.55
Lee,	4,274	4,066	−208	−4.87
Russell,	847	846	−1	−0.12
South Hadley,	3,949	4,443	+494	+12.51
West Springfield,	4,448	6,125	+1,677	+37.70
Totals,	43,526	59,012	+15,486	+35.58

The population of the cities and towns in this group was 43,526 in 1885 The percentage of increase is 35.58, the population now being 59,012, although the growth is seen to be quite unequal when the municipalities are compared with one another.

The several groups are brought together in the following recapitulation:

Classification by Industries.	Increase in 1895 as compared with 1885		Classification by Industries.	Increase in 1895 as compared with 1885	
	Number	Percentages		Number	Percentages
Textiles, ...	+151,079	+36.75	Leather, ...	+5,165	+20.12
Boots and shoes, . .	+61,448	+22.29	Paper and paper goods,	+15,486	+35.58
Metals and metallic goods,	+34,015	+32.69			

If we rank the cities and towns by industries according to the percentage of growth in each class, shown in 1895 as compared with 1885, the groups take the following order: Textiles, Paper and Paper Goods, Metals and Metallic Goods, Boots and Shoes, and Leather. It must be remembered that in forming the groups of cities and towns under the foregoing heads, the classification is somewhat arbitrary, and is made, as before stated, upon the basis of the industry which leads for the city and town in the number of persons employed in 1885, the industrial returns for 1895 not being available as yet. Some of the places have diversified industries which of course have contributed to their growth. For example, Holyoke, classed as a paper town, has large textile interests; Taunton, classed under textiles, is largely engaged in metals and metallic goods; Lowell, besides textiles, has extensive manufactories of metals and metallic goods and machinery; Lynn, besides boots and shoes, is connected with the leather industry, and Worcester, classed under metals and metallic goods, has also various other extensive industries. Within the limitations stated, however, the classification is indicative.

Special Presentations for the City of Boston.

Before closing the analytical consideration of the growth in population, we present, for the city of Boston, a table showing the population according to the old ward lines, that is to say, according to the ward lines which had existed since 1875, being superseded by a new division taking effect, so far as the Census was concerned, in May of the census year.

City of Boston.	Population		Increase (+), or Decrease (−), in 1895 as compared with 1885	
	1885	1895	Number	Percentages
Boston, ...	390,393	496,920	+106,527	+27.29
Ward 1, ...	15,659	23,821	+8,162	+52.12
Ward 2, ...	15,760	18,774	+3,014	+19.12
Ward 3, ...	12,328	13,943	+1,615	+13.10
Ward 4, ...	12,518	13,375	+857	+6.85
Ward 5, ...	12,827	12,986	+159	+1.24
Ward 6, ...	17,256	18,194	+938	+5.44
Ward 7, ...	12,038	12,965	+927	+7.70
Ward 8, ...	11,986	13,990	+2,004	+16.72
Ward 9, ...	11,239	11,857	+618	+5 50
Ward 10, ...	9,746	5,883	−3,863	−39.64
Ward 11, ...	17,863	25,729	+7,866	+44.04

City of Boston.	Population		Increase (+), or Decrease (−), in 1895 as compared with 1885	
	1885	1895	Number	Percentages
Boston — Con.				
Ward 12,	13,845	10,748	−3,097	−22.37

Ward 25,	8,516	15,001	+6,485	+76.15

An inspection of the percentages in the preceding table will enable the reader to trace the growth of different sections of the city since 1885. In a subsequent presentation the growth of the city proper, and the growth of the annexed and outlying sections will be shown, with comparisons from the earliest years.

In order to comply with requests received from persons desiring the figures, the population of Boston has been distributed according to police and missionary districts, the first being arbitrary divisions of the city made for police purposes by the Board of Police Commissioners, and the second administrative districts for missionary work in charge of the City Missionary. As these tabulations may possibly be of wider interest they are inserted below, it being understood, however, that the distribution in each case, although fairly accurate, is approximate, for the reason that boundaries of the wards are seldom coterminous, either wholly or in part, with those of the districts named, and, therefore, in making up the district population, in some instances, arbitrary divisions of the ward figures were necessary. The first presentation exhibits the population by Police Divisions.

Police Divisions.	Estimated Population in 1895	Police Divisions.	Estimated Population in 1895
Boston,	496,920	Boston — Con.	
Number 1,	22,288	Number 9,	51,798
Number 2,	10,970	Number 10,	44,171
Number 3,	25,070	Number 11,	42,004
Number 4,	12,244	Number 12,	35,828
Number 5,	52,809	Number 13,	36,116
Number 6,	29,555	Number 14,	15,001
Number 7,	39,995	Number 15,	40,304
Number 8,	2,600	Number 16,	36,167

The next presentation shows the population by Missionary Districts, and in this case it is possible to give the population within the same territorial divisions in 1885.

Comparisons of the Male and Female Population.

The presentation, pages 25 to 32, shows the number of males and females, together with the total population, and the percentages of males and females of the whole population, for each county, city, ward, and town, and for the State. This is followed by the presentation, pages 33 to 42, which shows the increase and decrease of the population by sex, for each municipality, by counties, and for the State. By these presentations we find that in 1895 the males in the State numbered 1,214,701, and the females 1,285,482, these tables indicating that the males represented 48.58 per cent of the entire population, and the females, 51.42, the excess of females representing 2.84 per cent of the entire population.

Analyzing the final presentation, we find that the males in 1885 numbered 932,884, or 48.03 per cent of the whole population, while the females numbered 1,009,257, or 51.97 per cent of the total population, the excess of females representing 3.94 of the whole population. Thus it will be seen that while the females still remain in excess, the proportion which this excess of females represents of the whole population has declined during the decade. The results may be more readily compared by means of the following table, which recapitulates the figures for 1885 and 1895, with percentages:

Census Years.	Males	Females	Population	Percentages	
				Males	Females
1895,	1,214,701	1,285,482	2,500,183	48.58	51.42
1885,	932,884	1,009,257	1,942,141	48.03	51.97
Increase,	281,817	276,225	558,042	+0.55	−0.55

The final line of the foregoing table shows at once that the numerical increase in males during the decade has been 281,817, the numerical increase in females being 276,225;

and while the percentage which the males constitute of the total population has increased 0.55 per cent, the percentage which the females constitute of the total population exhibits a corresponding decline.

The following table presents a similar comparison for the years 1885 and 1875:

Census Years.	Males	Females	Population	Percentages	
				Males	Females
1885,	932,884	1,009,257	1,942,141	48.03	51.97
1875,	794,383	857,529	1,651,912	48.09	51.91
Increase,	138,501	151,728	290,229	—0.06	+0.06

The males in 1875 numbered 794,383, and represented 48.09 per cent of the whole population, the females numbering 857,529, constituting 51.91 per cent of the whole population. Comparing these figures with those for 1885 it will be seen that the excess of females was slightly greater, when considered as a percentage of the total population, in 1885 than in 1875. In 1875, there were 107.95 females to 100 males; in 1885, 108.19 females to 100 males; while in 1895 there are 105.83 females to 100 males. In 1840, the excess of females over males was but 7,672, or 102.13 females to every 100 males; in 1855 there was an excess of females over males of 32,301, or 105.87 females to every 100 males; in 1865 the excess of females was 63,011, or 110.46 females to every 100 males. During the last 55 years, the percentage of females of the whole population was highest in 1865, being 52.48 per cent, and lowest in 1840, or 50.53 per cent.

The following table exhibits the percentages of males and females respectively of the total population in 1885 and 1895, with the increase or decrease in percentages in 1895 as compared with 1885:

The State, and Counties.	Percentages of Males in—		Increase (+), or Decrease (—), in Percentages in **1895** as compared with **1885**	Percentages of Females in—		Increase (+), or Decrease (—), in Percentages in **1895** as compared with **1885**
	1885	**1895**		**1885**	**1895**	
THE STATE.	48.03	48.58	+0.55	51.97	51.42	—0.55
Barnstable,	48.47	48.07	—0.40	51.53	51.93	+0.40
Berkshire,	48.96	49.28	+0.32	51.04	50.72	—0.32
Bristol,	47.86	48.21	+0.35	52.14	51.79	—0.35
Dukes,	48.51	48.54	+0.03	51.49	51.46	—0.03
Essex,	47.78	49.01	+1.23	52.22	50.99	—1.23
Franklin,	50.10	50.55	+0.45	49.90	49.45	—0.45
Hampden,	47.89	48.47	+0.58	52.11	51.53	—0.58
Hampshire,	47.29	47.63	+0.34	52.71	52.37	—0.34
Middlesex,	47.44	47.94	+0.50	52.56	52.06	—0.50
Nantucket,	42.65	43.60	+0.95	57.35	56.40	—0.95
Norfolk,	47.97	48.05	+0.08	52.03	51.95	—0.08
Plymouth,	49.65	49.95	+0.30	50.35	50.05	—0.30
Suffolk,	47.69	48.29	+0.60	52.31	51.71	—0.60
Worcester,	49.01	49.62	+0.61	50.99	50.38	—0.61

In the counties of Barnstable, Bristol, Dukes, Hampden, Hampshire, Middlesex, Nantucket, Norfolk, and Suffolk, the percentages of females of the total population are slightly greater than for the State at large. All of the counties show a decrease in the percentages of females of the total population in 1895 as compared with 1885, except

the county of Barnstable, which shows an increase. The increases and decreases are, of course, comparatively slight. Similar comparisons for each of the cities are brought forward in the following table:

Cities.	Percentages of Males in —		Increase (+), or Decrease (—), in Percentages in 1895 as compared with 1885	Percentages of Females in —		Increase (+), or Decrease (—), in Percentages in 1895 as compared with 1885

Worcester,	49.25	49.47	+0.22	50.75	50.53	—0.22

* The same for both years.

The females constitute more than 50 per cent of the population in each of the cities except Gloucester and Quincy, the highest percentage, 55.61, being found in the city of Northampton, and the lowest in the city of Gloucester, 42.37. In other words, in each of the cities there is an excess of females except in Gloucester, where the males are considerably in excess, this excess being due to the peculiar character of the city as the centre of the fishing industry. In 1885, there were five cities in which males were in excess of females, namely, Brockton, Gloucester, Marlborough, Quincy, and Woburn. The percentage which the females constitute of the whole population has declined in every city except Brockton, Everett, Marlborough, Medford, Northampton, Taunton, and Woburn. The greatest decline is found in the city of Gloucester. In the city of Malden, the percentage of females in 1885 and 1895 is identical. The distribution of the excess of males and the excess of females as regards the relative location in cities and towns is shown in the following table:

The State, and Counties.	Excess of Males				Excess of Females				Net Excess of Females
	Number of Cities or Towns	Males	Females	Excess of Males	Number of Cities or Towns	Males	Females	Excess of Females	
The State, . .	165	176,211	160,528	15,683	186	1,037,700	1,124,164	86,464	70,781

* Two towns (Sandisfield in Berkshire, and Bernardston in Franklin) show no excess, there being an equal number of males and females.

From this table it is seen that for the State, two cities, representing a population of 48,923, or 1.96 per cent of the whole population, show an excess of 4,807 males, while 30 cities, with a population of 1,586,844, or 63.47 per cent of the total population, show an excess of 61,712 females, the net excess of females in the cities as a whole being 56,905. It may be mentioned in passing that the net excess of females in the cities as a whole in 1885 was 56,244. Thus, notwithstanding changes in the cities when considered individually, the net excess of females within municipalities under city government is, numerically, substantially the same as in 1885. On the other hand, 163 towns, having a population of 287,816, or 11.51 per cent of the whole population, show an excess of 10,876 males, while 156 towns, having a total population of 575,020, or 23 per cent of the total population of the State, show an excess of 24,752 females, the net excess of females in the towns taken as a whole being 13,876, as against 20,129, the numerical net excess of females in towns in 1885. In 1895, the cities show 30.65 per cent of the total excess of males, 71.37 per cent of the total excess of females, and 80.40 per cent of the net excess of females; while the towns show 69.35 per cent of the total excess of males, 28.63 per cent of the total excess of females, and 19.60 per cent of the net excess of females. The cities in each of the counties when taken together show an excess of females, except in the county of Norfolk, which contains but one city, namely, Quincy, wherein the males are in excess. When the towns of each of the counties are grouped together, each group exhibits an excess of females, except in Franklin County, wherein the 21 towns when taken together show an excess of males. In the town of Sandisfield, in Berkshire County, and Bernardston, in Franklin County, there is an equal number of males and females.

VILLAGES: BY TOWNS.

VILLAGES: BY TOWNS.

[This presentation shows the number of families, the number of males and females, and the total population of each city and town, and the same facts for the several villages or sections of which each city or town is composed. The population which lies outside of the well defined limits of the villages or sections is included under the name of the city or town itself which is, of necessity, repeated under its own name in order to present the total population for the town. In those cases where the name of the city or town is simply repeated, it means that no villages or sections were reported separately owing to lack of definite boundaries, although such undefined villages or sections are actually located in some cities and towns.]

VILLAGES, SECTIONS, ETC.:

ALPHABETICALLY.

VILLAGES, SECTIONS, ETC.: ALPHABETICALLY.

[In this presentation the villages, sections, etc., in each town and city of the State are arranged alphabetically. Following the name of the village, section, etc., is given the name of the city or town, the county, and, in the case of villages, the number of families and the number of males, females, and total population.

In this presentation the aggregate population of the cities and towns is not given. This may, of course, be found by referring to the preceding table, "VILLAGES: BY TOWNS." The population which, in any city or town, exists outside the limits of the villages or sections for which population figures are given in this table, may also be found in the preceding table, but, to avoid confusion, is omitted here.

It has been found impossible to give the population of each locality, as many of the popular names given indicate sections to which there are no definite boundaries, but for the larger sections or villages the number of families and the population by sex are presented.

The asterisk (*) indicates post offices, the parallel (||) railroad stations, and the section sign (§) steamboat landings.]

Tabular Analyses

For the Following Presentations:

	Pages
Villages: By Towns,	69–84
Villages, Sections, Etc.: Alphabetically,	85–124

The presentations of the population by villages require no special analysis, but a brief explanation is needed in order to prevent misconception as to their significance.

The villages or sections within town or city limits, as presented by name in the tables, have neither exact geographical boundaries nor legal autonomy. They are aggregations of population, sometimes separated by considerable territory, and sometimes divided by imaginary lines, concerning which no exact information can be obtained, and as to the location of which no general agreement exists. In some cases the village has grown up around a factory, in others it is the development of a distinct settlement made in early years, that has never reached the importance of a separate municipal organization. Frequently the village is also a railway station, and sometimes it possesses a post office.

The rapid growth of certain parts of the Commonwealth, and the settlement of problems relating to water supply and sewerage and other important questions which have arisen in consequence of this growth, make it essential to determine the population of these villages. This has been attempted in previous censuses, but until now without success, owing principally to the lack of agreement as to the village boundaries. Unusual care has, however, been devoted to the determination of the village and section population in the present census, and it is believed that the results as given in the presentations, although for obvious reasons approximate, are nevertheless fairly accurate. The returns, as originally made by the enumerator, have been carefully scanned, and so far as the village names are concerned, compared with the census of 1885. All discrepancies have been noted, and the lists submitted to the town and city clerks, accompanied by the following letter:

Upon the other side of this letter sheet you will find a statement in regard to the names of villages in your town, as reported by the Census Enumerators for 1885, and also those reported for 1895. Will you kindly inform us upon the back of this sheet in the blank space at the right why certain villages that were named in 1885 do not appear in the 1895 returns; also please give the dates between 1885 and 1895 when the new villages returned in 1895 were first designated by their present names.

In the tabular statement on the back part of this sheet we give the number of families and the population for each of the villages returned by the Census Enumerators in your town for the year 1895. Please examine this list and inform us whether the list of villages so reported is complete, whether the names are properly spelled, and whether each village mentioned is really a village and known as such in your town.

If there are any so-called village designations which are simply "popular" designations or "nicknames" for sections of your town, but which should be properly combined with some other village, will you kindly mark out these popular designations and indicate at the right of the tabular presentation to which line they should be added?

It is obviously difficult for this office to obtain a proper knowledge of the villages in each city and town without the experienced co-operation of town officers who are thoroughly familiar with the town or city in which they reside. Any information that you can supply in relation to this matter which we have not asked for specifically above will be greatly appreciated by this office and will contribute to making the village presentation for your town of more value to your citizens and to the Commonwealth.

The results, after making such changes and corrections as were suggested by the city and town clerks, were submitted to the postmasters of the various towns, to whom the following letter was sent:

Upon the other side of this sheet you will find a statement of the villages and localities in your town, with certain designations, namely, — "V" for village, "P D" for popular or local name, "P O" for post office, and "R R" for railway station. Will you kindly state whether the names so given are correct and whether they include all the villages, localities, etc., in your town; and if not, will you please give us the additional names and make such correction in the spelling as will make the names conform to local usage?

It may be that one place is given two names; if so, will you indicate such and suggest which of the two names is the more popular and to be retained in print?

It is obviously difficult for this office to obtain a proper knowledge of the villages in each town without the experienced co-operation of town officials who are thoroughly familiar with the town in which they reside. Any information that you can supply in relation to this matter which we have not asked for specifically above will be greatly appreciated by this office and will contribute to making the village presentation for your town of more value to your citizens and to the Commonwealth.

In the presentation "VILLAGES: BY TOWNS," the population as finally determined is presented for every section which was found to possess an individuality sufficient to justify its separate presentation. In the subsequent presentation the villages are presented alphabetically, and with these are included the names of localities or districts which have a local significance or are found in local usage, but which are not sufficiently distinct as to boundaries, or are not of sufficient importance to warrant the presentation of separate population figures. In this table, also, the railway stations and post offices throughout the Commonwealth are designated.

The following table shows the number of cities and towns, villages, and localities with popular designations. It should be borne in mind that only the cities and towns have fixed boundaries and legal status.

THE STATE, AND COUNTIES.	Number of Cities and Towns	Number of Villages	Number of Localities with Popular Designations	Totals
THE STATE.	353	759	1,031	2,143
Barnstable,	15	56	46	117
Berkshire,	32	47	58	137
Bristol,	20	44	91	155
Dukes,	7	11	20	38
Essex,	35	67	121	223
Franklin,	26	49	44	119
Hampden,	23	38	45	106
Hampshire,	23	46	25	94
Middlesex,	54	101	153	308
Nantucket,	1	4	6	11
Norfolk,	27	64	71	162
Plymouth,	27	81	117	225
Suffolk,	4	7	105	116
Worcester,	59	144	129	332

In some cases, particularly in the cities and larger towns, villages which were formerly quite distinct have now grown together so as to present a practically homogeneous population. In such cases no attempt has been made to give the village or section population, although the names, which are still used, may be found in the alphabetical table. An example in point is found in the city of Somerville.

In order to complete the information as to post offices it should be stated that the following stations are comprised in the Boston postal district:

A . . .	South End.	N . . .	Jamaica Plain.
B . . .	Back Bay.	O . . .	Mattapan.

Censuses of Population: 1765-1895.

Dates of Incorporation, Changes in Name, Area, Boundaries, Population, Etc., for Counties, Cities, Towns, and The State.

CENSUSES OF POPULATION 1765–1895.

The presentation which follows gives, in a brief manner, the date of incorporation, or establishment, of every city and town in the State, together with changes in area, boundaries, etc. In the case of a number of the older towns it has been found that there is no official record of the date of establishment; therefore, we have, in such cases, given the date when the first mention of the town name is to be found in the official records of the State, together with the title of the book of records, the number of the volume, and the page. The early spelling in all such cases has been retained as a matter of permanent record. These dates have been taken from the reports of the Commissioner of Public Records.

Following the historical facts relative to each city and town is given the population by each Census between 1765 and 1895, a period of 130 years.

In the case of the towns of Adams, Mount Washington, New Ashford, and Washington in Berkshire County, Merrimac in Essex County, Erving and Hawley in Franklin County, and Brockton (city), East Bridgewater, and West Bridgewater in Plymouth County, and also in the case of the counties of Franklin, Hampden, and Norfolk population figures appear prior to the dates given for incorporation. This is due, undoubtedly, to the fact that the territory in question was well defined and recognized in Census enumerations prior to the date of its formal incorporation, or establishment, as a county, district, or town. In the case of the town of Merrimac the Census returns for the town of Amesbury, of which it constituted a part at the time of the taking of the State Census in 1875, were divided after the enumeration was completed and the results for Merrimac, which was made a town in 1876, were presented separately.

The population is also given for such districts, gores, or unincorporated tracts of land, towns, etc., which have been ceded to other States, or annexed to existing towns and cities in this State and have ceased, therefore, to have a separate corporate existence. The towns and districts which were ceded to other States are as follows: Boston Corner, ceded to the State of New York in 1853 (see Mount Washington, Berkshire County), and Pawtucket, by a change in boundary line, annexed in 1861 to the State of Rhode Island (noted under Seekonk, Bristol County). The gores, etc., for which population is given for 1790 and a tract of land designated as "No-town," for which the population is given for 1830, are as follows: For 1790, in Berkshire County, gore adjoining Adams and Windsor, gore adjoining Williamstown; in Worcester County, gore adjoining Fitchburg, gore adjoining Leominster, gore adjoining Oxford, gore adjoining Princeton, gore adjoining Sturbridge; and, for 1830, in Worcester County, No-town.

The cities and towns which have become a part of the city of Boston by annexation are as follows: town of Brighton (Middlesex County), in 1873; city of Charlestown (Middlesex County), in 1873; town of Dorchester (Norfolk County), in 1869; city of Roxbury (Norfolk County), in 1867; and town of West Roxbury (Norfolk County), in 1873. The population of these cities and towns has been included in the counties in which they were existent previous to annexation, but an historical description of them has been included under the city of Boston, together with the population, from the date of first mention, or establishment, to the date of annexation. The rule has been followed of incorporating the historical facts regarding all obsolete districts or towns with the notes relative to the cities or towns of which they now form a part.

The Provincial Censuses of 1765 and 1776 have been taken from an abstract of the State Census for 1865, in which they were reproduced, with corrections, from printed and manuscript returns, which appeared to be the only authentic records of these counties in existence. For certain towns, for which no returns seem to have been made, the population has been supplied from the next succeeding census in which returns for these towns are reported, the figures in all such cases being enclosed in brackets, thus, [2,6]0].

The Census returns for 1765 do not include Indians, of which there were 1,569 in the State, distributed in Barnstable, Berkshire, Bristol, Dukes, Middlesex, Nantucket, and Plymouth counties, and while the returns for 1776 present details by towns for white persons, 4,761 colored population were not included in the totals for the State. The colored population was distributed among all of the counties. The figures representing the population of Indians and colored persons have been included under the showing "The State," and in a foot-note is noted the distribution by counties and numbers under these two Censuses.

CENSUSES OF POPULATION—1765–1895.

COUNTY OF BARNSTABLE.

Incorporated June 2, 1685. (Plymouth Colony Laws, edition 1836, p. 295.)

TOWN OF BARNSTABLE.

There is no record of the date of establishment of this town. The first mention is found on page 31 of Volume XI of the Plymouth Colony Records wherein it is stated that, among other representatives to the General Court, the member for Barnstable was Mr. Thom. Dimmack. This was on March 5, 1638. The town was established from common land and the first recorded attempt at defining its boundaries was on June 17, 1641, when the boundary line between Barnstable and Yarmouth was established. On March 2, 1652, it was enacted that the Bounds between Barnstable and Sandwich "to be" established; evidently meaning "shall be." Barnstable and Yarmouth agreed upon boundary line March 11, 1658. On June 3, 1662, additional lands were granted to Barnstable. On June 10, 1662, the boundaries between Barnstable and Sandwich were again ordered to be established. Boundary line between Barnstable and Mashpee established March 28, 1894.

TOWN OF EASTHAM.

Originally called "Nawsett." The first known record is found in Volume VIII of the Plymouth Colony Records, wherein Nawsett is mentioned, on page 177 under the year 1643, in the list of "towns" having freemen able to bear arms. On March 3, 1645, according to Volume II of the Plymouth Colony Records, certain common land "lying between sea and sea" were granted to those who go to dwell at "Nossett." On June 2, 1646, Nawsett was established as a township, and on June 7, 1651, the name of the town of Nawsett was changed to Eastham. March 5, 1678, according to the Records, Eastham and purchasers on both sides were to settle on the boundary lines. June 16, 1763, a part of Eastham was established as the District of Wellfleet. A part of Harwich annexed July 14, 1772. Part of Eastham established as Orleans March 3, 1797, and on March 9, 1839, another part of Eastham was annexed to Orleans. A part annexed to Wellfleet April 26, 1847. Boundary line between Eastham and Orleans established and a part of each town annexed to the other town March 23, 1867. The boundary line between Eastham and Wellfleet at tidewater established May 6, 1877.

TOWN OF MASHPEE.

Established June 14, 1763, as the District of Mashpee, to remain in force three years. Above Act revived March 20, 1767 to remain in force until July 1, 1770. On November 15, 1770, Act again revived, and to remain in force until the end of the session of the General Court next after November 1, 1775. On February 9, 1776, the Act was again continued in force until the end of the session next after November 1, 1779. On November 25, 1779, the Act again continued until November 1, 1785. On June 13, 1788, the above Act was repealed and three "Guardians to the Proprietors" appointed, Act to remain in force for 10 years. March 7, 1797, the last named Act made perpetual until repealed by the Legislature. Part of the plantation of Marshpee annexed to Sandwich, February 26, 1811. On March 31, 1834, the "Plantation of Marshpee" established as the "District of Marshpee," to be under the guardianship of a commissioner appointed by the Governor. A part of the land formerly in the plantation of Marshpee annexed to Falmouth March 17, 1841, and part to Sandwich April 1, 1859, and another part to Sandwich March 13, 1860. May 28, 1870, the District of Marshpee abolished and the town of Mashpee established. Part of Sandwich reannexed to Mashpee March 19, 1872. Boundary lines established as follows: between Mashpee and Falmouth June 18, 1885; between Mashpee and Sandwich May 27, 1887, and a part of Sandwich annexed; and between Mashpee and Barnstable March 28, 1894.

TOWN OF SANDWICH.

On March 6, 1638, certain persons were ordered to go to "Sandtich" to set forth the bounds (Plymouth Colony Records, Volume I, p. 80). Boundary line between Sandwich and Barnstable established March 2, 1652, and June 10, 1662. The boundary lines established January 19, 1663, ordered to be entered on the records of the court, June 7, 1670. October 28, 1684, boundaries established. Part of the plantation of Marshpee annexed February 26, 1811. Parts of the District of Marshpee annexed April 1, 1859, and March 13, 1860. Part of Sandwich reannexed to Mashpee March 19, 1872. Boundary between Sandwich and Falmouth established March 19, 1880. Part of Sandwich set off as a new town, Bourne, April 2, 1884. Boundary between Sandwich and Mashpee established May 27, 1887, and a part annexed to Mashpee.

TOWN OF TRURO.

Established July 16, 1709, from common land called Pawmett as the township of "Truroe." (Prov. Laws, Vol. I, p. 642.) Part of Truro annexed to Provincetown June 12, 1813, and boundary between the towns established. Another part annexed to Provincetown March 2, 1829, and the boundaries again established. Another part annexed to Provincetown March 30, 1836, and on February 22, 1837, the boundaries between Truro and Wellfleet established.

TOWN OF YARMOUTH.

The first mention of this town occurs in Plymouth Colony Laws, Volume I, p. 108, on January 7, 1639, "the land at Mattacheeset, now called Yarmouth." Boundary line between Yarmouth and Barnstable established June 17, 1641. Yarmouth and Barnstable agreed upon boundary line March 11, 1658. Part of Yarmouth set off and established as the town of Dennis June 19, 1793.

TOWN OF ADAMS.

Established October 15, 1778, from the plantation called East Hoosuck. The plantation called New Providence annexed April 10, 1780. Part of Adams included in the new town of Cheshire March 14, 1793, and on April 16, 1878, a part was set off and established as North Adams. The date of establishment of this town is subsequent to the date of the earliest census in which population appears. This is due, probably, to the fact that the territory in question was well defined and recognized in census enumerations prior to the date of its formal incorporation as a district or town.

TOWN OF MOUNT WASHINGTON.

Established June 21, 1779, from the plantation called Tanconnuck Mountain. Boundary line between Mount Washington and Egremont established June 17, 1817, and part of each town annexed to the other town. Boundary line between Mount Washington and the District of Boston Corner established March 12, 1847. The District of Boston Corner was established April 14, 1838, from common land, but owing to its inconvenient location was a constant source of annoyance, being the resort of prize fighters and other law breakers, who were there secure from the jurisdiction of the State, and for this reason the district was ceded to the State of New York May 14, 1853. The population of Boston Corner was 67 in 1790; 92 in 1820; 64 in 1830; 65 in 1840; and 73 in 1850. The date of establishment of Mount Washington is subsequent to the date of the earliest census in which population appears. This is due, probably, to the fact that the territory in question was well defined and recognized in census enumerations prior to the date of its formal incorporation as a district or town.

TOWN OF NEW ASHFORD.

Established as a district February 26, 1781, from land called New Ashford, lying between Adams, Hancock, Lanesborough, and Williamstown. Part of the district of New Ashford included in the new town of Cheshire March 14, 1793, and on February 6, 1798, another part was annexed to Cheshire. Part of Hancock annexed to the district of New Ashford June 26, 1798. On May 1, 1836, the district was made a town by Chapter 15 of the Revised Statutes. Boundary line between New Ashford and Hancock established May 20, 1851. The date of establishment of this town is subsequent to the date of the earliest census in which population appears. This is due, probably, to the fact that the territory in question was well defined and recognized in census enumerations prior to the date of its formal incorporation as a district or town.

TOWN OF OTIS.

Established February 27, 1773, as "Loudun" from a tract of common land called "Tyringham Equivalent." Loudon and the District of Bethlehem united as the town of Loudon June 19, 1809. (The District of Bethlehem established June 24, 1789, from the North Eleven Thousand Acres.) Act of June 19, 1809, took effect March 1, 1810, and part of Loudon (Bethlehem District) was annexed to Becket. The name of Loudon changed to Otis June 13, 1810. Part of the common lands called East Eleven Thousand Acres annexed to Otis April 9, 1838.

TOWN OF REHOBOTH.

Established June 4, 1645, from common land called "Seacunck." Boundary lines "to be" established June 6, 1649. Part of Rehoboth included in the new town of Swansea March 5, 1668. Certain common lands annexed to Rehoboth June 3, 1668. Boundary line between Rehoboth and Swansea established August 11, 1670. The land called the North Purchase granted to Rehoboth July 5, 1671. Boundary lines established July 7, 1682. The part called the North Purchase established as the new town of Attleborough October 19, 1694. Boundary line between Rehoboth and Attleborough established September 10, 1697. Part of Rehoboth established as the new town of Seekonk February 26, 1812.

TOWN OF SEEKONK.

Established February 26, 1812, from a part of Rehoboth. A portion of the territory was called Pawtucket (established March 1, 1828), and by Act of April 10, 1861, all of Pawtucket, except that part lying easterly of Seven Mile River, was annexed to Rhode Island and new boundary lines established. The excepted part of the above territory was annexed to Seekonk. On January 29, 1862, a municipal district by name of East Seekonk established to consist of the excepted territory named in the Act of April 10, 1861. Said

CENSUSES OF POPULATION — 1765-1895 — Continued.

TOWN OF SEEKONK — concluded.

district to cease "so soon as the proper officers of the future town of Seekonk shall have been elected and qualified." Population of Pawtucket was, for 1830, 1,459; 1840, 2,184; 1850, 3,753; 1855, 4,132; and 1860, 4,200.

TOWN OF SWANSEA.

Established as "Swansey" March 5, 1668, from a part of Rehoboth called the "Township of Wannamoisett," and places adjacent. A neck of land called "Papasquash Neck," excepting 100 acres, annexed July 5, 1669. Boundary line between Swansea and Rehoboth established August 11, 1670. Boundary lines established July 5, 1679. Boundary line between Swansea and Mount Hope "to be" established November 1, 1679. Part of Swansea established as Somerset February 20, 1790. The name of this town is variously spelled. It is derived from Swansea in Wales, Rev. John Miles, who came here from Wales with a part of his church in 1663, being the first minister. The termination of the Welch name is "sea." Notwithstanding this, the spelling that appears in the earliest records of the town is Swansey, and this was retained in the records until 1718, after which it was changed to Swanzey, this continuing consecutively, or nearly

TOWN OF SWANSEA — concluded.

so, until 1865, when the form Swansey was again adopted, and from that date to the present the name has been so spelled in the town records. The State Department of the Commonwealth, however, following ancient departmental and legislative usage, still retains the form Swanzey. On the other hand, the U. S. Departmental usage, including the name of the Post Office, is Swansea. The name of the Railroad Station of the town is similarly spelled by the Railroad Corporation, and this form is used in the legislative manual. It would seem to be historically accurate if the Welch derivation is taken into account, and the others seem to be corrupt spellings, that of Swansey being the more ancient. The form Swansea is also taught in the public schools of the town, is in use by a large proportion of the people, and so far as usage is concerned, any other spelling is rapidly becoming obsolete. This manner of spelling the name has been used in the State Censuses since 1875, and is therefore retained in the present Census.

CITY OF TAUNTON.

Established March 3, 1639, from common land called Cohannett. Land at Assonet granted to Taunton March 3, 1640. Boundary lines established June 19, 1640. Certain lands granted to Taunton October 26, 1672. The land called Assonet Neck annexed to Taunton July —, 1682. The North Precinct of Taunton granted to be a town by the name of Norton March 17, 1710. Bill to perfect said grant passed June 12, 1711. South Precinct of Taunton established as Dighton May 30, 1712. Part of Taunton established as Rayuham April 2, 1731. Part of Taunton included in the new town of Berkley April 18, 1735. Certain lands in Berkley belonging to Taunton annexed to Berkley February 6, 1810, and March 3, 1842. Taunton incorporated as a city by Act of May 11, 1864. Act accepted by the town June 6, 1864. Boundary line between Taunton and Raynham established February 27, 1866. Boundary line between Taunton and Lakeville (Plymouth County) established June 1, 1867. Part of Taunton, known as Myricks District, annexed to Berkley by Act of April 1, 1879, said Act accepted by town of Berkley April 12, 1879.

COUNTY OF DUKES COUNTY.

This county was incorporated November 1, 1683, by the State of New York, to which it belonged, and contained the Island of Nantucket, "Martius" Vineyard, Elizabeth Island, and No-Man's Land. By the Province Charter of 1692 the "Isles of Cappawock and Nantuckett near Cape Cod" were granted to the Province of Massachusetts Bay. On June 13, 1693 (Province Laws, Volume I, page 117), the "Islands of Capawock, alias Martha's Vineyard," are referred to, and on June 22, 1695 (Province Laws, Volume I, page 216), it was ordered that the "Islands of Martha's Vineyard, Elsabeth Islands, the islands called Noman's land and all the dependencies formerly belonging to Dukes County (the island of Nantucket only excepted) shall be and remain, and continue to be one county to all intents and purposes, by the name of Dukes County."

TOWN OF CHILMARK.

There is considerable ambiguity concerning the date of establishment of this town and of Tisbury. In the New York State Book of Patents, Volume IV, page 73, under date of July 8, 1671, appears a grant headed "Tisbury Mannor." By it Governor Lovelace granted to Thomas Mayhew, Senior, and Thomas Mayhew, Junior, a certain island containing lands bought of the Indians called Chickemote, Keep-hickon, Quia-naimes, Nashowa-Kemmuck, together with two of the Elizabeth Islands called Kataymuck and Nanname-sitt, and several other small and inconsiderable islands in Monument Bay to be called and known by the name of "Tysbury Mannor." September 14, 1694, Chilmark is mentioned in the Tax Act (also Tisbury). On June 17, 1696, it was Resolved, the constable of Chilmark empowered to collect the tax levied in 1694, while on October 30, 1714, it was Resolved, "the Mannour of Tisbury, commonly called Chilmark" to have all the powers of a town; whether under the name of Chilmark or Tisbury is not stated. Boundary lines between Chilmark and Gay Head, as established May 9, 1855, confirmed May 28, 1856. Part of Chilmark known as Elizabeth Islands established as Gosnold March 17, 1864. Boundary line between Chilmark and Tisbury established February 27, 1882.

TOWN OF DANVERS.

Established as a district January 28, 1752, from the village and Middle Parishes in Salem. Made a town June 16, 1757, but the Act was disallowed by the Privy Council August 10, 1759; however, by general Act of August 23, 1775, the district was made a town. Boundary line between Danvers and Salem established March 17, 1840. Part of Danvers set off as the new town of South Danvers May 18, 1855, the name of the latter town being changed April 13, 1868, to Peabody. Boundary line between Danvers and South Danvers established May 31, 1856. Part of Beverly annexed April 27, 1857.

COUNTY OF FRANKLIN.

Incorporated June 24, 1811, from a part of Hampshire County; Act took effect December 2, 1811. The date of incorporation of this county is subsequent to the date of the earliest census in which population appears. This is due, probably, to the fact that the territory in question was well defined and recognized in census enumerations prior to the date of its formal incorporation as a county.

COUNTY OF HAMPDEN.

Incorporated February 25, 1812, from a part of Hampshire County; Act took effect August 1, 1812. The date of incorporation of this county is subsequent to the date of the earliest census in which population appears. This is due, probably, to the fact that the territory in question was well defined and recognized in census enumerations prior to the date of its formal incorporation as a county.

CITY OF NORTHAMPTON.

First mentioned May 14, 1656, on page 259, Vol. IV, Part 1, Mass. Records, "Forasmuch as the towns of Springfield and North Hampton are so remote," and the second mention is on page 271, same volume, "Northwottock, alias North Hampton." Boundary line between Northampton and Springfield (Hampden County) established June 4, 1685. A strip of common land divided between Northampton and Westfield (Hampden County) June 4, 1701. Part established as Southampton January 5, 1753. Part established as Westhampton September 29, 1778. Part annexed to Southampton September 29, 1778. Part included in the District of Easthampton June 17, 1785. Part of Hadley annexed April 15, 1850. Boundary line between Northampton and Westhampton established March 12, 1872. Northampton incorporated as a city June 23, 1883. Act of incorporation accepted by the town September 5, 1883.

TOWN OF PRESCOTT.

There is considerable ambiguity about the early establishment of this town. In the Mass. Records, Vol. III, p. 302, on May 18, 1653, it is stated: "Considering that there is already at Nashaway about 9 families . . . this Court doth hereby give and grant them liberties of a township and at the request of the inhabitants do order it to be called 'Prescott.'" This record is confusing in regard to Nashaway, which appears to have been made Prescott, West Towne, and Lancaster by one Act (See Lancaster, Worcester County). Parts of New Salem (Franklin County) and Pelham established as Prescott January 28, 1822.

TOWN OF NATICK.

First mentioned in Mass. Records, Vol. V, p. 227, on April 16, 1679, relative to an exchange of land made between the plantation of Natick and Sherborn, said exchange being ratified by the General Court May 30, 1679. Boundary line between Natick and Dedham (Norfolk County) established October 18, 1701. In the Province Laws, Vol. III, p. 234, "the plantation of Natick, belonging to no particular town" is mentioned June 28, 1745. On February 28, 1762, the Parish of Natick is established as the District of Natick. On February 18, 1781, the District of Natick made the town of Natick, being an Act confirmatory of the general Act of August 23, 1775. Boundary line between Natick and Needham (Norfolk County) established and part of each town annexed to the other town June 22, 1797. Part of Sherborn annexed February 7, 1820. Boundary line between Natick and Wayland established April 26, 1850. Part annexed to Framingham April 22, 1871.

COUNTY OF NORFOLK.

On May 10, 1643, the Colony was divided into four counties: Essex, Middlesex, Suffolk, and Norfolk. The latter was composed of the towns of Haverhill, Salisbury, Hampton, Exeter, Dover, and Strawberry Bank (Portsmouth). The four last-named towns having been "taken off," upon the separation of New Hampshire from Massachusetts, January 1, 1680, the others were set back to Essex February 4, 1680, and the original county of Norfolk ceased to exist. The present Norfolk County was incorporated March 26, 1793. The date of incorporation of this county is subsequent to the date of the earliest census in which population appears. It is evident that the territory was well defined and recognized for census purposes prior to the date of its formal incorporation as a county.

CITY OF BROCKTON.

Originally established as North Bridgewater June 15, 1821, from part of Bridgewater. Boundary line between North Bridgewater and West Bridgewater established January 26, 1825. Name authorized to be changed March 28, 1874. Brockton adopted as the name May 5, 1874. Part annexed to South Abington (now Whitman) and parts of East Bridgewater and South Abington annexed April 24, 1875. Brockton incorporated as a city April 9, 1881. Act of incorporation accepted by the town May 23, 1881. Part of West Bridgewater annexed to Brockton, if the Act is accepted by Brockton, May 8, 1893. Act accepted by Brockton November 7, 1893, taking effect March 1, 1894. Act of May 8, 1893, amended March 12, 1894. The date of establishment of North Bridgewater is subsequent to the date of the earliest census in which population appears. This is due, probably, to the fact that the territory was well defined and recognized in census enumerations prior to the date of its formal incorporation as a town.

TOWN OF EAST BRIDGEWATER.

Established June 14, 1823, from part of Bridgewater. Boundary line between East Bridgewater and Bridge-

CENSUSES OF POPULATION — 1765–1895 — Continued.

TOWN OF EAST BRIDGEWATER — concluded.

water established February 23, 1838. Boundary line between East Bridgewater and Bridgewater established and part of each town annexed to the other town March 20, 1846. Part of Halifax annexed and boundary line established April 11, 1857. Part included in the new town of South Abington (Whitman) March 4, 1875. Part annexed to Brockton April 24, 1875. The date of establishment of this town is subsequent to the date of the earliest census in which population appears. This is due, probably, to the fact that the territory in question was well defined and recognized in census enumerations prior to the date of its formal incorporation as a district or town.

TOWN OF HULL.

The date of establishment of Hull is not positively known. On May 20, 1642, according to Mass. Records, Vol. I, p. 5, a report of a committee was made to the General Court concerning the allotment of lands at Nantasket, said report being dated "9th of the 2d month," 1642. "Nantaskot" is again mentioned May 10, 1643, as being within the shire of Suffolk. On Sept. 7, 1643, a former grant to "Nantascot" was confirmed. On May 29, 1644, it was ordered "that Nantascot shall be called Hull" and on May 26, 1647, Hull is mentioned as a town.

TOWN OF MARSHFIELD.

On March 2, 1641, it was "enacted by the Court that Green's Harbour shall be a township . . . and that it shall be called by the name Rexhame" (Plymouth Colony Records, Vol. XI, p. 37). On the same date, but in Vol. II, p. 9, of Plymouth Colony Records, "Rexame" is in the list of places for which constables were chosen. On June 1, 1641, Rexhame is mentioned in a list of towns and the name then disappears from the records. Name of Rexhame was changed to Marshfield about this time though the transaction was not recorded. On March 1, 1642, Marshfield is mentioned as one of the towns for which officers were chosen (Plymouth Colony Records, Vol. II, p. 34). Boundary lines established March 7, 1643. Certain lands granted to Marshfield and Duxbury March 5, 1661. Boundary line between Marshfield and Duxbury established February 23, 1683. Part included in the new town of Pembroke March 21, 1712. Part of Scituate annexed March 10, 1788. Boundary line between Marshfield and Duxbury established June 14, 1813. Boundary line between Marshfield and Scituate established May 11, 1887.

TOWN OF WEST BRIDGEWATER.

Established February 16, 1822, from part of Bridgewater. Boundary line between West Bridgewater and North Bridgewater established January 26, 1825. Part of West Bridgewater annexed to Brockton if the Act is accepted by Brockton May 8, 1893; Act accepted by Brockton November 7, 1893, taking effect March 1, 1894. Act of May 8, 1893 amended March 12, 1894. The date of establishment of this town is subsequent to the date of the earliest census in which population appears. This is due, probably, to the fact that the territory in question was well defined and recognized in census enumerations prior to the date of its formal incorporation as a town.

CHARLESTOWN.

First mention of Charlestown occurs in Mass. Records, Vol. I, p. 73, August 23, 1630, where it is stated that the first Court of Assistants was held at "Charlton." Boundary lines between Charlestown and Newe Towne (now Cambridge, Middlesex County) established March 6, 1632. Boundary lines between Charlestown and Boston established July 8, 1635. Boundary lines established "eight miles into the country from their meeting house" March 3, 1636. Boundary lines between Charlestown and Boston established March 28, 1636. "Lovels Iland is graunted to Charlestowne, provided they imploy it for fishing by their own townsmen or hinder not others," October 28, 1636. Certain common lands granted to Charlestown May 13 and October 7, 1640. "The Iland called Lovels Iland" granted to Charlestown, "provided half the timber and fire-wood shall belong to the garrison at the castle," October 27, 1648. One thousand acres of land granted to Charlestown November 12, 1659. Certain common lands granted to Charlestown October 21, 1663. The grant made November 12, 1659, renewed October 19, 1664. Part of Charlestown established as Stoneham (Middlesex County) December 17, 1725. Parts of Charlestown annexed to Cambridge April 18, 1761, March 6, 1802, February 12, 1818, and June 17, 1820. Part of Medford (Middlesex County) annexed to Charlestown June 21, 1811. Part of Charlestown annexed to West Cambridge (Middlesex County) February 25, 1842. Part of Charlestown established as Somerville (Middlesex County) March 3, 1842. Charlestown incorporated as a city February 22, 1847. Act of incorporation accepted by the town March 10, 1847. By Act of May 14, 1873, Charlestown was annexed to the city of Boston, the Act being accepted by both cities October 7, 1873, taking effect January 5, 1874.

CENSUSES OF POPULATION — 1765–1895 — Concluded.

THE STATE.

The Commonwealth of Massachusetts covers part of the territory originally granted to the Plymouth Company of England. It grew out of the consolidation of the colonies of Plymouth and Massachusetts Bay. The settlement at Plymouth began with the landing of the Pilgrims, December 22, 1620. The colony of Massachusetts Bay originated with the settlement under John Endecott at Salem, in 1628. In 1643, a confederacy was formed consisting of the colonies of Massachusetts Bay, Plymouth, Connecticut, and New Haven. In 1692, under a new charter given by William III, the colonies of Massachusetts Bay and Plymouth were consolidated as a royal province, including also Maine. In 1780, after the Revolution, the present State Constitution was adopted. In January, 1788, the Constitution of the United States was ratified by Massachusetts. The colonists in New Hampshire, in 1641, as a measure of protection and defence against the Indians, allied themselves with the colony of Massachusetts Bay and remained part of said colony until 1679, when New Hampshire was made a separate royal province, Massachusetts thereby losing part of its territory, January 1, 1680 (see Norfolk County). The territory now comprising the State of Maine was set off from Massachusetts by an Act passed March 3, 1820, taking effect March 15, 1820. By the Province Charter of 1692, certain islands now comprising the county of Dukes County and Nantucket County were ceded to Massachusetts from New York (see county of Dukes County). Certain common lands in Berkshire County, known as the District of Boston Corner, were ceded to the State of New York May 14, 1853 (see town of Mount Washington, Berkshire County). By a settlement of a boundary controversy between Massachusetts and Rhode Island, certain exchanges of territory were made between these States April 10, 1861 (see Fall River, Seekonk, and Westport).

* Includes 1,569 Indians distributed by counties as follows: Barnstable, 515 (of which 230 were in Mashpee); Berkshire, 221 (in Stockbridge); Bristol, 167 (principally in Dartmouth and Freetown); Dukes, 313 (of which 188 were in Chilmark); Middlesex, 37 (in Natick); Nantucket, 93; Plymouth, 223.

† Includes 4,761 colored population distributed by counties as follows: Barnstable, 171; Berkshire, 216; Bristol, 585; Dukes, 59; Essex, 1,049; Franklin, Hampden, and Hampshire (one county), 245; Middlesex, 702; Nantucket, 133; Plymouth, 487; Norfolk and Suffolk (one county), 682; Worcester, 432.

Tabular Analysis.

Pages
Censuses of Population: 1765–1895, ... 129–216

This presentation requires no extended analytical treatment. The information, while requiring much research on the part of the Bureau to ensure accuracy, has been so presented that the reader may easily follow the growth of the towns and cities from the earliest years. The student of the Census returns of the Commonwealth will note that a consolidation of two distinct presentations, as shown in Part 1, Volume I, of the Census of 1885, has been made for the Census of 1895, combining the historical features of the settlement and acquisition of additional territory with the purely statistical information as to the numerical gain or loss in population of the counties, cities, and towns. This arrangement, it is thought, will make the presentation easy of reference, as the notes relating to the establishment or incorporation of cities and towns, changes in boundary lines, annexation of one city or town to another, etc., appear in connection with the Census figures for each city and town, while the increases or decreases for each Census, as compared with the one preceding, being computed, will save the reader much time.

The dates relative to the establishment or incorporation of the cities and towns, as given in the Census of 1885, have been carefully compared with those contained in the first and subsequent reports of the Commissioner of Public Records and with other official sources of information. Each date has been subjected to careful scrutiny by the Bureau and it is believed that, as far as the archives of the Commonwealth show, those printed in this volume are correct. The authorities consulted have been

Reports of the Commissioner of Public Records,
Manual of the General Court,
Massachusetts Records,
Plymouth Colony Laws,
Plymouth Colony Records,
Massachusetts Archives,
Resolves and Orders (unprinted),
Province Laws,
Acts and Resolves,
Boston Town Records.

As will be noted, there are a number of instances where the actual date of establishment of certain towns cannot be given, as up to the present time no authentic knowledge exists. In cases of this kind the method adopted has been to give the date when the first mention of the town appears in some of the volumes of record. For instance, while it is not certainly known in what year Rev. William Blackstone settled at the place called Shawmut (one of the olden time names for Boston), it is supposed to have been between 1623 and 1626. In April, 1630, Charlestown was settled by colonists, and it is a matter of record that many of these colonists, acting upon the suggestion of Mr. Blackstone, settled at Trimountain (apparently the original name for Boston) in August 1630, yet it was not until September 7 (17, new style) that any mention is found in the Massachusetts Records, and on this date the Great and General Court ordered that Trimountain should be called Boston. No prior mention can be found of the establishment of the city of Boston or its boundaries.

In 1626, Roger Conant, who had previously removed from Nantasket to Cape Ann in charge of a party of settlers, built the first house at Naumkeag on the site of the present city of Salem. Capt. John Endecott and his followers landed there in 1628, yet the name Salem first appears in the Massachusetts Records in August, 1630; although Naumkeag (Nahumkeke) is mentioned in 1628.

The town records of Sutton show that by an order dated May 15, 1704, a township was granted, but the first mention of Sutton in the State records is October 28, 1714. Many other instances may be found of the lack of actual dates in the history of many of the older towns.

There is no record in the State archives of the incorporation of the following cities and towns:

Andover,	Eastham,	Plymouth,
Barnstable,	Falmouth,	Salem,
Boston,	Gay Head,	Sandwich,

We have retained, wherever practicable, the language used by the authors of the various original acts, together with the old form of spelling town names whenever it has been deemed advisable to do so, the authority for dates and quotations being given for purposes of reference. Undoubtedly many dates which are now lacking or obscure will be brought out when the forthcoming volume of the Province Laws, containing resolves, orders, etc., relating to the establishment of towns, is published.

We call particular attention to the notes on page 131, which should be read carefully in connection with the historical and statistical data contained in the presentation itself.

For the purpose of showing the percentages of increase or decrease in population in the different counties, and for the State, the following table is introduced:

Census Periods.	Percentages of increase or decrease in population — Counties							
	Barnstable	Berkshire	Bristol	Dukes	Essex	Franklin	Hampden	Hampshire
1765-1776* (Provincial)	28.19	107.78	25.35	20.29	17.00	104.37	59.79	89.05

* 11 years. † 14 years. ‡ 130 years.

The final line indicates the percentages of increase or decrease during 130 years. It shows, for example, that the State has increased its population since 1765, the date of the first provincial census, to the extent of 949.64 per cent. The percentage of gain in the different counties varies from 80.65, in Dukes County, to 3,277.54, in Suffolk County. The county of Nantucket, however, shows a loss of 9.16 per cent in the 130 years. While the total percentages of increase are thus shown, the table also exhibits the percentages of increase during each census period, respectively. For example, in the first census period, 1765–1776, the State gained 23.88 per cent. This was a period of 11 years. The next census was taken in 1790, 14 years later, and in this period, 1776–1790, the gain was 28.37 per cent. After 1790, censuses were taken at regular intervals of ten years, until 1850 and since 1850 at intervals of five years; and the percentages for each period, for each of the counties, and for the State, may be readily found in the table.

It will be noted that Barnstable County shows a decline since 1855, and Nantucket County a decline since 1820, with the exception of the periods 1830–1840 and 1850–1860, in which increases appear. Between the years 1790 and 1800 and between 1850 and 1875, declines are noticed in Dukes County; in the period 1810–1820, a slight decline is found in the county of Berkshire; also, in Norfolk County, a considerable decrease in the periods 1860–1870 and 1865–1875; and in the periods 1830–1840 and 1855–1865, Franklin County shows a decline of 2.76 per cent and 0.99 per cent, respectively. In the first period, 1765–1776, the county of Suffolk shows a decline of 79.93 per cent. With these exceptions, every county in the State shows an increase during each census period. The increases are, however, not uniform. The gain in Suffolk, which is entirely out of proportion to that which is elsewhere exhibited, is of course due to the growth of the city of Boston, and the increase in Boston as estimated and taken at different periods since and including 1638, representing the growth of the metropolis on its original territory, and by annexation, is presented in the following table, which was first prepared and published by this Department in 1882, and is now brought forward to include the census figures of 1895:

	Census Years.	Census taken by—	Boston, including Annexations	*a* Boston proper: Settled, 1630; Made a City, 1822	Annexed Territory	Annexations

a By Boston proper is meant the territory of Boston, independent of all annexations.

b Estimates made in the years named. Those for 1675 and 1698 were probably too large.

c Estimates based on censuses of polls.

d Estimate based on actual number of houses in 1789, and the average persons to a house, as shown by the U. S. census of 1790.

e By the census of May, 1840, the population of Boston was 84,401. Mr. Shattuck, in his report on the census of Boston for 1845, shows clearly that the U. S. census of 1840 was incorrect.

f Estimated.

g Included also in the population of Dorchester in this year. After 1855, Washington Village is included in South Boston.

h The population of South Boston could not be stated definitely for 1875, because the wards including South Boston also included a part of Boston proper. The figures given are very close, however.

If we trace the growth of Boston as presented in the preceding table, we begin with the population shown on the original territory, settled in 1630, and estimated and presented for the year 1638, namely, 150. Upon substantially the same territory, the population in 1895 is 160,349. The first gain from annexed territory appears in the enumeration for 1790, the gain being very slight. In recent years, however, the gain by

i The territory of Roxbury and Dorchester was not kept intact by ward boundaries in the ward division of 1875; it is difficult, therefore, to give the exact population of each district by the census of 1880. The figures given are the result of very careful study of the population by census enumeration districts, of which there were 208 in Boston for the U. S. census of 1880.

k The population, as usually given in census tables, includes that of the islands in the harbor.

m For the separate islands as follows: 1880—Breed's, 152; Deer, 851; Galloupe, 5; Rainsford, 187; Long, 49; Lovell, 5; Spectacle, 53; Thompson's, 106; Fort Independence, 13; Fort Warren, 112; Fort Winthrop, 12. 1885—Breed's, 348; Deer, 1,145; Galloupe, 6; Rainsford, 204; Long, 81; Lovell, 7; Spectacle, 61; Thompson's, 122; Fort Independence, 11; Fort Warren, 129; Fort Winthrop, 25. 1895—Breed's, included in East Boston; Deer, 1,620; Galloupe, 6; Rainsford, 83; Long, 612; Lovell, 3; Spectacle, 94; Thompson's, 119; Fort Independence, 2; Fort Warren, 164; Fort Winthrop, 3.

n Included in East Boston.

annexation has been quite important, beginning with Roxbury, annexed in 1867, followed by Dorchester, annexed in 1869, and by West Roxbury, Brighton, and Charlestown, which were annexed in 1873. The population upon territory which has been annexed since the original settlement of the city is 336,571, out of 496,920, the total population of the city in 1895. The population on the territory acquired by the annexation of East Boston

is now 39,889; South Boston, 67,913; Roxbury, 92,088; Dorchester, 45,909; West Roxbury, 32,761; Brighton, 15,001; and Charlestown, 40,304. The population upon the islands in the harbor is 2,706.

The population of the original territory shows a decline as compared with the last preceding enumeration, the United States census of 1890, from 161,330 to 160,349. A decline between two census periods has never before been found since the Revolution, except between the years 1865 and 1870. The present decline is due to the encroachment of business upon the residential section.

During the ten years, 1885 to 1895, however, there has been a gain upon the original territory from 147,138 to 160,349. The gain upon the annexed territory since 1885 is from 243,255 to 336,571, the largest numerical gain being shown in the Roxbury district, and the next largest in Dorchester. In percentages of gain during this period, the Dorchester section leads all others, as will appear from the following table, showing the percentages for 1895 as compared with 1885, in the city proper, and in each of the annexed districts:

Divisions of Boston.	Increase in 1895 as compared with 1885	Percentages of Increase
The City proper,	13,211	+ 8.98
East Boston (including the islands),	11,176	+ 35.57
South Boston,	6,379	+ 10.37
Dorchester,	25,192	+121.60
West Roxbury,	15,337	+ 88.02
Brighton,	6,478	+ 76.01
Charlestown,	2,631	+ 6.98
Roxbury,	26,123	+ 39.60
The City,	106,527	+ 27.29

The following table shows the percentages of population of the entire city, found in the different territorial divisions:

Divisions of Boston.	Population	Percentages
The City proper,	160,349	32.27
East Boston (including the islands),	42,595	8.57
South Boston,	67,913	13.67
Dorchester,	45,909	9.24
West Roxbury,	32,761	6.59
Brighton,	15,001	3.02
Charlestown,	40,304	8.11
Roxbury,	92,088	18.53
The City,	496,920	100.00

It will be seen from this table that while the population on the annexed territory is much larger, when considered in its entirety, than the population on the original territory, or city proper, nevertheless, the city proper contains the largest fraction of the total population which is found in any single subdivision, namely, 32.27 per cent. It may be pointed out in passing that in 1890 the city proper contained 35.97 per cent of

the entire population of the city. Roxbury contains 18.53 per cent of the total population, as against 17.49 per cent in 1890; South Boston, 13.67 per cent, as against 14.89 per cent in 1890; Dorchester, 9.24 per cent, as against 6.61 per cent in 1890; West Roxbury, 6.59 per cent, as against 5.57 per cent in 1890; Brighton, 3.02 per cent, as against 2.68 per cent in 1890. The population in East Boston, including the islands, constitutes 8.57 per cent of the total population of the city, and the population of Charlestown, 8.11 per cent of the total population, these proportions being about the same as obtained in 1890. That is to say, the city proper to-day, while containing nearly one-third of the total population of the city, has a smaller proportion of the population than it held five years ago, and while the districts of Roxbury, Dorchester, West Roxbury, and Brighton have each of them gained a larger proportion of the population than they held in 1890, South Boston has a smaller proportion, and East Boston and Charlestown retain about the same proportion as they held five years ago.

Political Condition: By Sex.

POLITICAL CONDITION: BY SEX.

The object of the presentation which follows is to show a classification of the political condition of the male population of the Commonwealth 20 years of age and over, and a similarly classified showing for the total population, including both sexes and all ages.

Although this presentation contains the more important facts in relation to the political condition of the male population 20 years of age and over, and also of the total population, yet reference may advantageously be had, in a full consideration of the question of political condition, to the following presentations, which appear in this and the second volume of the Census:

Population and Legal Voters,	Ages: By Five Year Periods,
Polls and Voters,	Ages: By Ten Year Periods,
Political Condition: By Age Periods,	Ages: By Selected Age Periods.

It is evidently impossible to combine in one table all the information relating to political condition; but by the use of the presentations mentioned above all desired information relating to the subject can undoubtedly be secured.

If we take a town and consider the figures in detail we shall learn the proper method of reading one line of the table. The method of reading calculated to bring out the facts for one town is equally applicable to the lines devoted to the remaining towns and cities of the Commonwealth.

In the town of Barnstable there are 1,311 ratable polls and four male persons with no political condition. The total, 1,315, is the total male population 20 years of age and over. There are 1,220 voters, 50 males above 20 years of age, who are all ratable polls, some of whom have not yet become voters on account of age limitation, while the balance have not complied with certain constitutional requirements, 41 aliens (that is, male persons born in foreign countries who have not yet become naturalized), and four persons having no political condition. If these four numbers are added together, the total is 1,315, which is the male population 20 years of age and over in the town.

Of the total male population 20 years of age and over, 99.70 per cent are ratable polls, while 0.30 per cent have no political condition; the total is 100 per cent, or the total male population 20 years of age and over. The total voters represent 92.78 per cent of the total male population 20 years of age and over. Of this 92.78 per cent, 89.36 per cent are native born voters and 3.42 per cent are foreign born naturalized voters. Of the total male population 20 years of age and over, as we have seen, 92.78 per cent are voters; the remaining 7.22 per cent is composed of 3.12 per cent aliens, 3.80 per cent of not voters, and 0.30 per cent of persons having no political condition; the total is 100 per cent, which means the total male population 20 years of age and over.

There are in the town of Barnstable 1,311 ratable polls and 2,744 persons having no political condition, the latter being males under 20 and females of all ages. The sum of these two numbers (1,311 and 2,744), or 4,055, is the total population of the town. If we add together the 1,220 voters, 50 not voters, 41 aliens, and the 2,744 persons of both sexes having no political condition, the total is 4,055, or the total population of the town.

Of the 4,055 persons in the town, the ratable polls, which are always males 20 years of age and over, represent 32.33 per cent, and the total voters comprise 30.09 per cent of the total population of the town. This percentage is composed of 28.98 per cent of native born voters and 1.11 per cent of foreign born naturalized voters. If we subtract 30.09 per cent from 32.33 per cent we secure 2.24 per cent, which represents 1.23 per cent of ratable polls, some of whom cannot become voters until they reach the age of 21, while the balance have not complied with certain constitutional requirements, and 1.01 per cent who have not yet taken proper steps to become citizens.

If we consider 4,055, the total population of the town, as being 100 per cent, 30.09 per cent are voters, 1.01 per cent aliens, 1.23 per cent not voters, while 67.67 per cent have no political condition; in other words, the actual political governing force in the town of Barnstable is 30.09 out of a total of 100 per cent.

The number of females 20 years of age and over may be found in the presentation entitled "AGES: BY SELECTED AGE PERIODS," in the second volume of the Census. This figure will allow of a direct comparison with the column in the first section of this presentation, which shows the total male population 20 years of age and over.

Assuming that women are endowed with the franchise on identically the same terms as men, the relative percentages of ratable polls for native born voters, foreign born naturalized voters, aliens, not voters, and women with no political condition, would approximate very closely to those shown in this presentation for men. If these percentages are applied to the female population 20 years of age and over it will be possible to construct a table for each city and town showing the political condition of women on the bases assumed. One of the principal objects in the preparation of this presentation has been to supply authoritative bases for such a computation.

Tabular Analyses

For the Following Presentations:

	Pages
Polls and Voters,	225-238
Political Condition: By Sex,	239-266
Political Condition: By Age Periods,	267-318

The presentations, pages 225 to 318, relate to the political condition of the people. The first table, pages 225 to 238, shows for each city and town, with a recapitulation for the State and counties, the number of polls and the number of legal voters, each class being subdivided so as to show first, with respect to the total polls, the percentage of voters, the percentage not voters, and the percentage of aliens; and, second, with respect to the total voters, the percentage native born and the percentage which, being of foreign birth, has acquired the franchise by naturalization.

Referring to the recapitulation on page 238, it will be seen that the total number of polls in the State is 766,233. It should be borne in mind that by law every male twenty years of age residing in the State on the first of May, in any year, and not a pauper or exempt by law, is a poll, and subject to a poll tax. The polls thus defined are made up of three classes: first, those who are aliens and who are not voters by reason of that fact; second, those who are not voters by reason of disability other than the incident of foreign birth, included under the head of "not voters" in the table; and, third, those who are legal voters. The total voters number 560,802, or 73.19 per cent of the total polls. We repeat that the term "voters," as used in the Census, means potential voters; in other words, a legal voter under the Census enumeration is a person who possesses the constitutional requisites for voting, or who could vote under the Constitution should he see fit to do so; that is, who has no disabilities other than those of a temporary character, for example, those relating to registration. The constitutional requisites for voting are thus set forth: "Every male citizen of twenty-one years of age and upwards, excepting paupers and persons under guardianship, who shall have resided within the commonwealth one year, and within the town or district in which he may claim a right to vote, six calendar months next preceding any election of governor, lieutenant-governor, senators, or representatives, shall have a right to vote in such election." This is further limited by a provision that "No person shall have a right to vote * * * * who shall not be able to read the Constitution in the English language, and write his name." It is provided, however, that this limitation shall not apply to any person prevented by physical disability from complying with its requisitions, or to any person who had a right to vote at the time of the adoption of the amendment under which the limitation was made, namely, May 1, 1857, nor to any person who was 60 years of age at that time.

In a previous report treating of this subject we have said that "Registered voters constitute the voting force fully equipped and in the field for action at any particular time. This force varies in numbers according to the varying conditions of different political campaigns. Besides these active voters there is always a reserve corps made up of those who for various reasons are not registered, but who constitute, nevertheless, part of the voting strength of the State." The legal voters, as included in the tables we are now considering, comprise both the active and reserve voters. They represent, in fact, the ultimate voting strength of the State.

In the Census taken in 1885, the legal voters constituted 77.93 per cent of the polls. It will be seen, therefore, that the proportion in the present Census is somewhat less than at that date. In 1895, the persons who are polls, and not aliens, but who nevertheless are not voters, constitute 5.85 per cent of total polls. This class includes persons who had passed their twentieth birthday at the date of the Census, and also paupers, persons under guardianship, and others who, although polls, are debarred by the constitutional provisions just cited. The aliens, or persons of foreign birth without the right of franchise on account of insufficient length of residence in the country, or who although resident here sufficiently long, have neglected to acquire citizenship, constitute 20.96 per cent of the total polls. In 1885, 4.62 per cent of the polls were not voters, and 17.45 per cent were aliens. It will be seen, therefore, that the alien and non-voter classes each constitute larger percentages of the total polls than was the case in 1885. In the present Census the total voters number 560,802. Of these, 75.37 per cent are native born and 24.63 per cent foreign born. By way of comparison it may be stated that the native born voters in 1875 constituted 80.27 per cent of the total voters, and in 1885, 77.69 per cent. These percentages, taken in connection with that shown in the present Census, exhibit a constant decline during the 20 years. The foreign born naturalized voters constituted 19.73 per cent of the total voters in 1875, the percentage rising to 22.31 per cent in 1885, and now forming, as above stated, 24.63 per cent. The percentage of voters of total polls is largest in the county of Nantucket, being 93.46. On the other hand, it is smallest in Bristol County, being but 68.16. The percentage of aliens of total voters is smallest in Nantucket County, being only 3.48, and largest in Bristol County, being 26.91 per cent. The percentage of voters of total polls is larger than the percentage for the State in the counties of Barnstable, Berkshire, Dukes, Essex, Franklin, Hampshire, Nantucket, Norfolk, and Plymouth. The percentage of aliens is larger than the percentage for the State in the counties of Bristol, Essex, Hampden, Middlesex, Suffolk, and Worcester. The largest percentage of native born voters of total voters is found in the county of Dukes, this percentage being 94.50, closely matched by the percentage 94.24 in Barnstable County, and 94.02 in Nantucket County These counties, of course, respectively, contain the smallest percentages of foreign born naturalized voters of total voters. The county which shows the largest percentage of foreign born naturalized voters of total voters is Suffolk, the percentage being 31.97. Next to this is found Bristol County, the percentage being 30.33. In Middlesex County the foreign born naturalized voters constitute 25.39 per cent of the total voters. In every other county except Suffolk, Bristol, and Middlesex the percentage of foreign born naturalized voters of total voters is less than the percentage for the State.

The following table brings forward a recapitulation for the cities:

The presentation, pages 239 to 266, shows very completely the political condition of the population by sex for each city and town, with a recapitulation for the State and counties. No table similar to this has ever been presented before in the Census reports, and the facts contained in it are of very great interest and importance. Referring to the recapitulation on pages 264, 265 we note a subdivision of the male population twenty years of age and over so as to exhibit its political condition. The total male population twenty years of age and over numbers 771,706. Of this population, the ratable polls number 766,233, or 99.29 per cent; the aliens, 160,610, or 20.81 per cent; the persons not voters for reasons other than birth, 44,821, or 5.81 per cent; the voters, 560,802, or 72.67 per cent. The native born voters constitute 54.77 per cent of the male population 20 years of age and over, while the foreign born naturalized voters constitute 17.90 per cent of this population. These percentages may be compared with those shown in the table previously analyzed. To express the facts in another way in connection with those of the preceding table, it may be said that of the total male population 20 years of age and over, nearly 55 persons in every 100 (54.77) are native born voters, while nearly 18 persons in every 100 (17.90) are foreign born naturalized voters. In other words, while of the total legal voters nearly 25 persons in every 100 are foreign born naturalized voters, such voters constitute only about 18 persons in every 100 of the total male population 20 years of age and over. Nearly six (5.81) persons in every 100 of the male population 20 years of age and over while not aliens are still not voters, while nearly 21 persons in every 100 (20.81) are aliens. Only 5,473 persons included in the male population 20 years of age and over are without political status, such persons constituting less than one in every one hundred. For the purpose of comparison the political condition of the population is shown in the table in terms of percentages of the total population as well as the male population 20 years of age and over. For example, referring again to the recapitulation for the State, the total population of both sexes is 2,500,183; and while of the male population 20 years of age and over only 0.71 per cent

is without political status, nevertheless, of the total population, 1,733,950 persons, constituting 69.35 per cent, are without political status, such persons comprising minors, paupers, and persons otherwise debarred, including those who are debarred on account of sex. The total voters constitute 22.43 per cent of the total population, the aliens only 6.43 per cent, the persons not voters, although males of voting age and not aliens, 1.79 per cent. The native born voters constitute 16.90 per cent of the total population, and the foreign born naturalized voters 5.53 per cent.

Comparing these percentages with the facts as they existed in 1875, or 20 years ago, we find that at that date the voters constituted 78.08 per cent of polls and 21.25 per cent of the population; while the aliens were 17.60 per cent of polls and 4.79 per cent of the total population. It appears, therefore, that during the 20 years the aggregate number

The final presentation, pages 267 to 318, exhibits the political condition of the total male population 20 years of age and over, by age periods. As before, we confine our analysis to the recapitulation, presented on page 318. The total male population 20 years of age and over being 771,706, we find 247,256 in the period 20 to 29; 198,441 in the period 30 to 39; 138,379 in the period 40 to 49; 94,232 in the period 50 to 59; 84,668 in the period 60 to 79; 7,283 in the period 80 years of age and over; while for 1,447 persons the facts as to age are unknown. Of the ratable polls who are not voters for reasons other than foreign birth, the total number being 44,821, the largest number is found in the period 20 to 29, it being understood that a person 20 years of age becomes

of voters and of aliens has not only increased, but the relative proportion of voters of population and the proportion of aliens of polls and of total population has also increased. In other words, while the relative voting strength of the population has increased, naturalization has not, apparently, quite kept pace with the growth of population. In 1885 as compared with 1875, the proportion of aliens to the total population of which they formed a part had not materially changed. It follows, therefore, that as to the aliens who have come into the State since 1885, naturalization has not proceeded quite so far as among those who came into the State between 1875 and 1885. In a subsequent tabulation, relating to the foreign born, we shall be able to show the extent to which naturalization has taken place among foreign born males of different nationalities.

The following table presents a recapitulation for the cities:

a ratable poll, but is not a legal voter until his twenty-first birthday has been passed. Of persons having no political status, including paupers and others legally debarred, the total number being 5,473, 642 are found in the period 20 to 29; 1,011 in the period 30 to 39; 1,028 in the period 40 to 49; 908 in the period 50 to 59; 1,541 in the period 60 to 79; 316 are 80 years of age and over; while for 27 the age is unknown.

The table also exhibits the number of native born voters, foreign born naturalized voters, and aliens for each of the age periods, but it is not necessary to point out the facts in detail. We conclude the analysis with a table showing these facts for the cities, with percentages for the city of Boston and for the State.

The following table presents the figures for the city of Boston, as shown on page 324, reduced to percentages:

City of Boston, and Age Periods.	Ratable Polls (Not Voters)	Ratable Polls and Native Born Voters	Ratable Polls and Foreign Born Naturalized Voters	Ratable Polls and Aliens	No Political Condition	Total Male Population 20 Years of Age and Over
City of Boston,	100.00	100.00	100.00	100.00	100.00	100.00
20 to 29 years,	66.59	35.64	16.74	40.33	12.98	33.82
30 to 39 years,	14.75	28.43	28.20	31.92	18.13	28.36
40 to 49 years,	8.24	17.58	24.03	14.88	17.18	18.00
50 to 59 years,	3.77	10.23	17.73	7.69	12.40	11.10
60 to 79 years,	1.84	7.49	12.65	4.73	31.49	7.88
80 years and over,	0.08	0.56	0.59	0.31	7.82	0.51
Age unknown,	4.73	0.07	0.06	0.14	–	0.33

From the above table, we find that 33.82 per cent of the total male population 20 years of age and over is classified in the age period 20 to 29 years; 28.36 per cent in the 30 to 39 year period; 18 per cent in the 40 to 49 year period; 11.10 per cent in the 50 to 59 year period; 7.88 per cent in the 60 to 79 year period; 0.51 per cent in the period 80 years and over, while for 0.33 per cent the age is unknown.

A similar analysis table follows for the State:

Size of Families

AND

Composition by Sex.

SIZE OF FAMILIES AND COMPOSITION BY SEX.

The distribution of the total number of families, by exact size, for each city, town, and for the State, is shown in this presentation. In addition, the composition by sex is shown for each city and for the State. By "composition by sex" is meant the number of males and number of females, respectively, in families of each specified size.

A description of the various columns in that portion of the presentation which relates to towns is herewith given. In the first column, to the right of the name, the full face figures (**1**, **2**, etc.) indicate the number of persons to a family, that is, show the size of the family. The second column shows the number of families of the specified size.

In the third and fourth columns are given percentages which show the proportions as regards total families and total population for families of each size; in other words, if the whole number of families in the town is considered as representing 100 per cent, and the total population is also considered as being represented by 100 per cent, the percentages given opposite each size of family show what proportion of the total families and of the total population is represented by the number of families and population comprehended by families of that size.

The proper method of reading this presentation is as follows: In the town of Barnstable there are 1,173 families. Of these 1,173 families, 124 are composed of one person each, this number of families being 10.57 per cent of the total number of families and containing 3.06 per cent of the total population of the town. There are 272 families composed of two persons each, this number of families being 23.19 per cent of the total number of families and containing 13.41 per cent of the total population. The other lines may be read in a similar manner.

In that portion of the presentation devoted to the cities and the State, the composition by sex is shown, which requires a different arrangement of the table and additional description. We supply a description of the second form of presentation.

In the first column the full face figures (**1**, **2**, etc.) indicate the number of persons to a family, or the size of the family; the figures in parentheses show the number of families of the specified size.

In the second column M indicates males and F females. Thus 1 M 1 F means a family of two persons, composed of one male and one female.

The third column gives the number of families of the specified size and sex composition.

In the fourth and fifth columns are given percentages which show the proportions, as regards total families and total population, of families of each size. A description of these percentages is given above.

We present a particular description of the manner of reading the presentation for cities which also applies to the presentation for the State.

If we look at the figures for the city of North Adams we find that there are 93 families containing one person each. By reference to the second and third columns we find that of these 93 families, 40 are composed of one male person each and 53 of one female person each. There are 722 families of four persons each. Of these, 229 families contain one male and three females each, 331 contain two males and two females each, 144 contain three males and one female each, one contains four males, and 17 contain four females each. The percentages given in the fourth and fifth columns relate to the whole number of families of the sizes designated, and the total population of those families, and not to the detail lines which are required to show the composition of family. In other words, the percentages 18.36 and 15.09 show, respectively, the proportion that 722 families of four persons each bear to the total number of families, while the population of those families, or 2,888, is 15.09 per cent of the total population of the city. The percentages contained in the fourth and fifth columns are to be read in the same manner as previously described in connection with the presentation for towns.

In many cases it happens that the percentages are less than one one-hundredth of one per cent, in which cases an asterisk (*) has been placed in the percentage column to indicate that fact.

In the presentation FAMILIES: NUMBER AND AVERAGE SIZE, which precedes SIZE OF FAMILIES AND COMPOSITION BY SEX, some families of very large average size appear in certain cities and towns. These cities and towns contain large aggregations of people in hotels, boarding and lodging houses, hospitals, asylums, jails, prisons, charitable institutions, etc., these being counted, for Census purposes, as families; and to this fact are due the high averages. The influence of these large families on city or town averages can be accurately determined, and, if desired, the large families may be eliminated, and the average size of family for the city or town as a whole obtained without taking them into account.

The space at the disposal of the Bureau would not permit of the printing in detail of the composition by sex of families of each size in each of the towns in the State, as such a presentation would have taken three times the space which is devoted to it in this volume; but the composition by sex of each of these large families, where they are located in cities, is shown in detail, and also in the recapitulation for the State. If for any purpose the composition of the families by sex is desired for any town in the Commonwealth, it can be supplied by the Bureau.

Tabular Analyses

For the Following Presentations:

	Pages
Families: Number and Average Size,	331–338
Size of Families and Composition by Sex,	339–443

The statistics relative to families are contained in two presentations. First, Families: Number and Average Size (pages 331 to 338); second, Size of Families and Composition by Sex (339 to 443).

From the recapitulation of the first presentation, contained on page 337, we note that the total number of families in the State is 547,385, the average size of each family being 4.57. In 1875, the average size of each family for the State was 4.60, and in 1885, 4.58. It is, therefore, plain that the average size of the family remains practically the same as it was in 1875, notwithstanding the increase in population and the changes that have taken place in the composition of the population, the most important of which are due to immigration. The average size of the family in Suffolk County is 4.79. This is the highest average reached in any county, the lowest being found in Nantucket, where the average size of the family is 3.07.

In conducting the Census enumeration, every aggregation of individuals living under one roof, or related directly to one head, either arbitrarily or otherwise, is considered a family. This interpretation of the term "family" varies somewhat from that ordinarily given to the word, and it follows, of course, that the Census family is not exactly identical with the normal family. For instance, a number of people living together in a hotel is considered a single family, the proprietor being taken as the head. In the same way, a penal or reformatory institution is considered a single family, the superintendent being the head. In 1885, however, it was shown by a careful analysis of the different families enumerated under this plan that, eliminating the families coming under an artificial designation, such as we have explained, the average size of the actual normal family in the State was 4.45, and, therefore, that the influence upon the average by including the artificial or arbitrary families, so classed for Census purposes, was immaterial, so far as the State taken as a whole was concerned, being but 0.13: and, as stated in that Census, "It makes but little difference, so far as great bodies of people are concerned, as, for instance, the population of the State, whether the families are considered on the basis of the actual normal family, or on the ordinary Census basis which includes all aggregations living under one roof, or having certain relations to one head."

For the purpose of showing the influence of the Census method of classification upon the average size of the families in the present Census, the following table is introduced:

Classification.	Number	Population	Average Size
Private families,	546,533	2,452,617	4.49
Hotels,	354	8,779	24.80
Penal and reformatory institutions,	35	7,850	224.29

Classification.	Number	Population	Average Size
Religious institutions and associations,	46	1,638	35 61
Public or private charitable institutions,	201	11,481	57.12
Hospitals and asylums,	57	8,656	151.86
Boarding schools, academies, etc.,	58	3,624	62.48
College dormitories,	68	3,784	55.65
Government stations,	7	413	59 00
Camps,	26	1,341	51.58
All Families,	547,385	2,500,183	4.57

The final line of the foregoing table reproduces the total number of families under the Census classification, the total population, and the average size of the family, the latter figure being 4.57, as previously cited. The total number of families, 547,385, comprises 546,533 private families, 354 hotels, 35 penal and reformatory institutions, 46 religious institutions and associations, 201 public or private charitable institutions, 57 hospitals and asylums, 58 boarding schools, academies, etc., 68 college dormitories, seven government stations, and 26 "camps;" the latter term being applied to temporary settlements of Italian or other laborers, employed on railroads or public works, and living together in a single community or camp. Excluding the private families, the other families named in the above classification are classed as families under the arbitrary method of Census classification as previously described. Excluding all such families, it will be seen, from the first line of the table, that the private families included 2,452,617 persons, the average size of each family being 4.49. If this figure is compared with the average given in the final line of the table, 4.57, it will also be seen that, as in 1885, the average size of the family for the State is not materially affected by including the arbitrary Census families.

It is found, nevertheless, repeating the experience of previous Censuses, that while the average size of the family for the State as a whole is not materially affected by the Census method of classification, which has been explained, the average for certain towns which happen to contain large institutions is somewhat affected. The exact effect is seen in the following table, which shows for each of the towns in which a family of 25 persons or more was found, the total population, the population of the large families, the population excluding large families, and the average number of persons to a family, based upon the total population, and also upon the population excluding the large families:

Towns.	Total Population	Population of Large Families			Population excluding Large Families	Average Number of Persons to a Family

A typical town shown in the foregoing table is Concord, in Middlesex County, the seat of the Massachusetts Reformatory. By referring to the figures, it will be seen that the average size of the family for this town, based upon the Census returns, including the large families, is 5.92. This is considerably above the average size of the family for Middlesex County, in which Concord is situated, the county average being 4.64. The average in Concord is increased by including as a single large family, the Massachusetts Reformatory, containing 1,032 persons. If this is excluded, the average number of persons to a family in the town becomes 4.74. Another such town is Wellesley, in Norfolk County, containing Wellesley College. When the whole population is used as a basis to determine the average number of persons to a family, the average is 5.73, the average for Norfolk County being only 4.54. Excluding certain large families, as shown in the table, the largest single family at Wellesley being at Wellesley College, the average number of persons to a family is found to be 4.66. It is not necessary to point out other towns in the table, as the facts for any town in which a family exceeding

25 persons in size is found can be readily ascertained. The cities have been excluded from this table, as the influence of the large families is not material when the population of a city is taken into account.

The second presentation relative to families, pages 339 to 443, exhibits the size of families by towns and the composition of the families by sex, in detail, for the cities and for the State, and brings out somewhat forcibly the presence or absence of abnormally large families in certain cities and towns.

This presentation is subdivided into three sections. The reader should follow carefully the note contained on page 341, which explains fully the manner in which the table is to be read. The first subdivision of the table relates entirely to the size of families for towns, and is contained upon pages 343 to 386, a recapitulation for both cities and towns, by counties, being found on pages 436 to 443. The last column of this recapitulation exhibits the facts for the State, showing, for example, that there are 21,836 families of one person each, 91,786 families of two persons each, 106,436 families of three persons each, families of this size being the most numerous. Families of four persons each number 99,152, after which the figures show a constant decline in number of families as the family increases in size.

In the following analysis table, the number of families of one, two, three, or more persons in the cities, towns, and State is shown with the percentages which such families form of the total number of families and total population in the cities, towns, and State, respectively:

Size of Families.	CITIES			TOWNS			THE STATE

* Less than one one-hundredth of one per cent.

From the preceding table it will be seen that in the cities there are 10,783 families of one person each, and in the towns 11,053 such families. The families of one person each constitute in the cities, 3.11 per cent of the total city families, and, in the towns, 5.50 per cent of the total town families. The city families of one person each constitute 0.66 per cent of the total city population, while the town families of one person each constitute 1.28 per cent of the total town population. The relative preponderance of families of certain sizes exhibits no radical changes since 1875. The families of one person each, while naturally showing a constant numerical increase, constitute, so far as the State as a whole is concerned, a slightly smaller percentage of the total number of families than was the case in 1885. The percentage at that time was 4.04, while in the present Census, as shown in the preceding table, it is found to be 3.99. The percentage which such families constituted of the total population of the State in 1885 was 0.88, while in 1895 it is 0.87. Families of from two to seven persons constituted 85.34 per cent of the total families in the State in 1885, and contained 75.24 per cent of the total population. These percentages in 1895 are, respectively, 85.67 and 75.49. For purposes of comparison we may also say that in 1885, families of from eight to 13 persons constituted 9.91 per cent of the total families, and contained 19.72 per cent of the population. In 1895 the percentages are 9.67 and 19.24, respectively. Families of from 14 to 22 persons constituted 0.52 per cent of the total families in 1885, and contained 1.86 per cent of the total population. In 1895 such families constitute 0.52 per cent of the total families, and 1.84 per cent of the total population. In 1885, families of 23 persons and over constituted 0.19 per cent of the total families, and contained 2.30 per cent of the total population. These percentages are now 0.15 and 2.56, respectively. In 1895, as in former censuses, families of three persons are the most numerous, such families constituting 18.89 per cent of the total city families, and containing 12 per cent of the total city population; they also form 20.40 per cent of the total town families, and contain 14.22 per cent of the total town population. When the town and city population is noted, and families of this size are considered with reference to the total State population, we find that they constitute 19.45 per cent of the total families in the State, and contain 12.77 per cent of the total population of the State. There are 220,058 families in the State containing from one to three persons, inclusive, and comprising in the aggregate 524,716 persons. These families represent 40.21 per cent of all the families, and contain 20.98 per cent of the total population. In the cities there are 130,763 such families, containing in the aggregate 316,193 persons, or 19.33 per cent of the total city population, while the families constitute 37.74 per cent of the total number of families in cities. In the towns there are 89,295 such families, containing in the aggregate 208,523 persons, constituting 24.12 per cent of the total town population, while the families constitute 44.44 per cent of the total families in towns. Of the 220,058 families in the State, each containing from one to three persons, inclusive, 59.42 per cent are found in the cities and 40.58 per cent in the towns. Of the 524,716 persons living in families of this class in the State, 60.26 per cent reside in the cities and 39.74 per cent in the towns.

The second and third sections of the presentation, showing the size of families and composition by sex, exhibit the composition of each family by sex for the cities and for the State. This table is entirely novel, never having been introduced in any previous Census. The second section, contained upon pages 387 to 426, relates to the cities in detail, while the facts as to the State, including both cities and towns, are shown in the third section, pages 427 to 435.

This table, at first glance, seems complicated, but if read in connection with the note on page 341, to which we have previously referred, it will be readily understood. It has already been pointed out that the families of three persons each were most numerous. Referring to such families in this table, page 427, we find, taking the figures in parenthesis, in the first column, that they number 106,436; and from the second and third columns of the table we find that this aggregate is made up of 54,801 families, each of which is composed of one male and two females, 45,090 families, each composed of two males and one female, 773 families comprising three males each, and 5,772 families comprising three females each. In the same manner the composition of all the families of various sizes in the State is shown.

The following analysis table shows the number of families which are composed of one sex only:

Size of Families.	Males		Females		Both Sexes	
	Families	Persons	Families	Persons	Families	Persons
1	7,456	7,456	14,380	14,380	21,836	21,836

Totals,	11,559	26,297	36,672	78,270	48,231	104,567

The aggregate number of families of one person each has been brought out in preceding tables, but, taken in connection with the analysis table now presented, which is based upon the presentation showing size of families and composition by sex, we find that the 21,836 families of one person each in the State are made up of 14,380 families which contain only females, and 7,456 families which contain only males. The existence of so-called families of but one person each is largely due to the industrial and commercial development of the cities and larger towns of the Commonwealth in which numerous single persons are employed, who are living in lodging rooms and providing their own meals in their rooms or taking their meals at restaurants. Every such person constitutes, in the Census, an independent family, as they recognize no other family head, and the preponderance of families of this class composed of females over those composed of males is due to the larger employment of single women who live in the manner stated. Proceeding farther with the analysis table, we find that there are 15,064 families of two persons each, this aggregate being composed of 12,709 families comprising two females each, and 2,355 families comprising two males each. This peculiar composition of families of two persons, each of the same sex, also reflects the conditions which we have noted in accounting for the families of one person each, and indicates the combination in single families of males or females, who are thus living together in family relations, although families of this kind composed of females only largely preponderate over those of males only. The families of three persons each which are composed of one sex only number 6,545, including 5,772 families composed of three females each, and 773 families composed of three males each. The number of three-person families, each composed of a single sex, thus exhibits a considerable decline numerically from the number of two-person families of this class. From this point upwards, as the families increase in size, the number rapidly decreases, there being among the single-sex families only 2,642 families of four persons each, and of these, 2,300 are composed of four females each. Families of five persons each, composed of one sex only, number but 1,001; single-sex families of six persons each, but 419; and single-sex families of seven persons each, but 172. The aggregate number of each numerical class then drops below 100 as the families increase in size. The largest family of but one sex is, as shown in the table, composed of 1,032 males; this being a penal institution, and, as previously explained, classed as a single family for Census purposes only.

Rooms:

Occupied Dwelling Houses.

ROOMS: OCCUPIED DWELLING HOUSES.

[For typographical reasons certain condensations have been made in column headings. The second column, headed "Number of Families of Specified Size," means the total number of families of the size specified in the first column, this number of families occupying the total number of rooms enumerated in the third column. The fourth column shows the average number of rooms occupied by families of each specified size, and the fifth column shows the average number of persons to a room. For instance, in the town of Barnstable there are 124 families of one person each occupying in all 799 rooms; this is an average of 6.44 rooms to a family and 0.16 persons to a room. Other lines may be read in a similar manner.]

Dwelling Houses: Number of Stories and Materials,	639–741

The tables respecting rooms, tenements, and dwelling houses relate directly to the housing of the people, and to the distribution of the population by rooms. This, of course, forms a basis for deductions as to the concentration of the population within certain territorial limits, and shows whether or not undue crowding exists in any quarter. Heretofore comparisons of density of population have generally rested upon the number of persons per acre. For the first time in any State Census, and indeed in any Census in this country, the population is distributed by rooms. That is to say, from the tables herein presented we may see the exact number of rooms occupied in the aggregate by families of each specified size, and the average number of persons to each room; and this information is obtainable for each town and city, and for each ward in a city, with aggregates for the State. Whether or not undue concentration of the population exists may be determined with much greater approach to accuracy from such data, than from any comparison based merely on the ground area occupied.

In analyzing this, the first table of the series relating to rooms, tenements, and dwelling houses, we shall, as usual, confine ourselves to the recapitulation. This may be found on pages 556, 557. The total number of families in the State is 547,385, and these families occupy 3,568,385 rooms; the average number of rooms per family being 6.52, and the average number of persons to a room, 0.70. Families of one person each occupy on the average 4.37 rooms; families of two persons each, 5.60 rooms; and families of three persons each, 6.09 rooms. There are in the State more families of three persons each than are found of any other size, the total number of such families being 106,436; and the average number of persons to a room in such families is 0.49. Taking the State as a whole, there are no evidences of undue crowding, notwithstanding the density of our population; that is to say, whatever crowding may exist in certain quarters of our large cities does not appear in the general average. Certain peculiarities shown in the table need explanation. For example, several instances occur of large families in which each person occupies a single room. The first example of this kind in the table is found in the families of 19 persons each, there being 163 such families in the State; the average number of rooms to each family being 18.94, and the average number of persons to a room, one. Another instance will be found in a single family of 61 persons, each person occupying one room. In general, it may be said that these large families having a single room assigned to each person are reported from penal institutions, comprise persons occupying dormitories in connection with colleges, or include other cases wherein certain aggregations of the population are classed as families for Census purposes, and the number of rooms assigned to each such family, and therefore the average number to each person, is more or less arbitrary. Other instances appear of families showing an abnormally large number of persons to a room. For example, the table shows a

single family of 162 persons occupying three rooms, or an average of 54 persons to each room. This is an Italian colony, living in barracks, and classed as a single family; and, in general, it may be said that wherever an abnormally large number of persons to a room appears in the table, it is because these persons, although considered independent families for Census purposes, are really aggregations of persons living in camps, or in barracks, or in hospital wards, or other similar places, the number of rooms occupied being thus reduced below the normal, and the average number of persons to a room correspondingly increased.

The average number of persons to a family in the State has been shown by a preceding table to be 4.57. The families containing five persons or less, include in the aggregate 1,312,104 persons, or 52.48 per cent of the entire population of the State. So far as the State as a whole is concerned, the average number of persons to a room in the tenements occupied by these families is less than one; the highest average being found in connection with the families of five persons each, namely, 0.75, and the lowest in connection with the families composed of but a single person each, this average being 0.23.

The average number of rooms occupied by the families of five persons each is 6.64. If such a family includes father, mother, and three children, it can be readily accommodated in a five-room tenement without serious crowding. Such a tenement would enable the family to have a kitchen, sitting room, and three sleeping rooms; or, a kitchen, dining room, sitting room (or parlor), and two sleeping rooms.

In order to enable a closer comparison of the concentration of the population in the different counties and in the cities, two analysis tables are inserted, the first summarizing the aggregates for the counties.

The State, and Counties.	Population	Total Number of Rooms Occupied	Average Number of Rooms Occupied per Family	Average Number of Persons to a Room
THE STATE.	2,500,183	3,568,385	6.52	0.70

Plymouth,	101,498	171,153	6.89	0.59
Suffolk,	539,799	678,450	6.01	0.80
Worcester,	306,445	436,897	6.49	0.70

The first line of this table reproduces the facts for the State, which we have already brought forward from the recapitulation of the main table; the other lines show the total population of each county, the total number of rooms occupied, the average number of rooms occupied per family, and the average number of persons to a room. It is at once apparent that, speaking only of the average conditions in the different counties, the number of persons to a room does not rise above one; the highest average being found in the county of Suffolk, which contains the city of Boston, wherein the average number of persons to a room is 0.80, and the lowest in the county of Nantucket, which is composed of the single town of Nantucket, the average number of persons to a room in this county being 0.41.

The next table presents the facts for the cities.

Cities.	Population	Total Number of Rooms Occupied	Average Number of Rooms Occupied per Family	Average Number of Persons to a Room

Worcester,	98,767	128,451	6.16	0.77

The largest city, Boston, contains a population of 496,920 persons, occupying in the aggregate 618,598 rooms, the average number of rooms to each family being 5.99, and the average number of persons to a room, 0.80. So far as our largest city is concerned, it is, therefore, shown that, on the average, the number of persons to a room does not exceed one. In a Tenement House Census of Boston, taken by this Bureau in 1891, it was shown that, considering rented tenements only, the average number of persons to a room for the city was 0.91. It was found, however, that in certain sections of the city a higher average existed, the highest being found at the North End, so-called, where the average number of persons to a room in rented tenements was 1.47. In the present Census, which includes all classes of tenements, it will be found by reference to the main table, pages 535 to 542, that the highest average number of persons to a room in Boston is in the present Ward 6, which also includes the North End district, this average being 1.23. The average number of persons to a room is higher in the city of Holyoke than in any other city, this average being 0.93. In Holyoke, the aggregate population, 40,322, occupies 43,167 rooms, the average number of rooms occupied being 5.47 per family, this being the smallest average number of rooms occupied per family in any city. The largest average number of rooms occupied per family in the cities, namely, 8.12, is found in the city of Newton. The smallest average number of persons to a room, is, however, found in the city of Newburyport, this average being 0.60.

We present an analysis table showing the city and town population compared, with respect to occupancy of rooms.

Classification.	Population	Total Number of Rooms Occupied	Average Number of Rooms Occupied per Family	Average Number of Persons to a Room
THE STATE.	2,500,183	3,568,385	6.52	0.70
Cities,	1,635,767	2,150,345	6.21	0.76
Towns,	864,416	1,418,040	7.06	0.61

The total population in the cities, 1,635,767, occupies in the aggregate 2,150,345 rooms; the average number of rooms to each family being 6.21, and the average number of persons to a room, 0.76. In the towns the population is 864,416, the total number of rooms occupied being 1,418,040, and the average number of rooms occupied by each family, 7.06, while the average number of persons to a room is 0.61.

Rooms: Occupied and Unoccupied Dwelling Houses.

The recapitulation of the presentation relating to rooms in occupied and unoccupied dwelling houses is presented on page 572. The information contained in it is so plainly presented that no special analysis in text is required to bring out the main facts. The occupied dwelling houses in the State contained 3,693,985 rooms. Of these, at the date of the enumeration, 3,568,385 were occupied and 125,600 unoccupied. The rooms in the unoccupied dwelling houses numbered 253,013, the total number of rooms in occupied and unoccupied houses aggregating 3,946,998. Of these, including occupied and unoccupied dwellings, there were 378,613 rooms entirely unoccupied at the date of the enumeration.

The facts as to the cities are brought forward in the following analysis table:

Cities.	Occupied Dwelling Houses			Rooms in Unoccupied Dwelling Houses	Total Number of Occupied and Unoccupied Rooms	Total Number of Unoccupied Rooms
	Occupied Rooms	Unoccupied Rooms	Total			
Beverly,	18,811	738	19,549	2,288	21,837	3,026

Northampton,	23,272	355	23,627	911	24,538	1,266
Pittsfield,	30,994	423	31,417	1,627	33,044	2,050
Quincy,	27,592	765	28,357	3,199	31,556	3,964

Cities.	Occupied Dwelling Houses			Rooms in Unoccupied Dwelling Houses	Total Number of Occupied and Unoccupied Rooms	Total Number of Unoccupied Rooms
	Occupied Rooms	Unoccupied Rooms	Total			
Salem,	48,372	1,568	49,940	2,195	52,135	3,763
Somerville,	74,418	3,079	77,497	5,245	82,742	8,324
Springfield,	77,438	2,708	80,146	4,669	84,815	7,377
Taunton,	41,645	2,044	43,689	1,497	45,186	3,541
Waltham,	28,995	495	29,490	1,799	31,289	2,294
Woburn,	19,629	628	20,257	825	21,082	1,453
Worcester,	128,451	8,562	137,013	4,899	141,912	13,461

In the city of Boston, the occupied dwelling houses contained 653,506 rooms. There were, however, 34,908 rooms in these houses which were unoccupied at the date of the enumeration. The additional unoccupied rooms, in dwelling houses entirely unoccupied, brings the aggregate number of unoccupied rooms to 70,304. These figures, as we shall hereafter point out in connection with other tables, throw light upon the possibility of increase of population within the limits of the rooms at present available for occupancy. In Fall River, to take for illustration a leading textile factory city, the total number of rooms unoccupied at the date of the enumeration was 8,105; of these, 2,700 were in houses entirely unoccupied. In Worcester, to cite a manufacturing city in which the industries are varied, but chiefly metals and metallic goods and machinery, there were 13,461 unoccupied rooms, of which 4,899 were in entirely unoccupied dwellings. In Lynn, a leading city devoted to the manufacture of boots and shoes, there were 7,616 unoccupied rooms, of which 3,774 were in entirely unoccupied houses. In Holyoke, the seat of the paper industry, there were only 3,852 unoccupied rooms, of which 1,557 were in unoccupied houses. It is not necessary to multiply examples, as similar comparisons can be made to any extent at the pleasure of the reader.

The final analysis table contrasts the facts for the cities and towns, in comparison with aggregates for the State.

Classification.	Occupied Dwelling Houses			Rooms in Unoccupied Dwelling Houses	Total Number of Occupied and Unoccupied Rooms	Total Number of Unoccupied Rooms
	Occupied Rooms	Unoccupied Rooms	Total			
THE STATE.	3,568,385	125,600	3,693,985	253,013	3,946,998	378,613
Cities,	2,150,345	91,957	2,242,302	115,477	2,357,779	207,434
Towns,	1,418,040	33,643	1,451,683	137,536	1,589,219	171,179

From this table it will be seen that the total number of unoccupied rooms in the cities of the Commonwealth at the date of the enumeration was 207,434, while in the towns the number of such rooms was 171,179. In the cities, 115,477 unoccupied rooms were in dwelling houses entirely unoccupied, while in the towns the number of such rooms was 137,536.

Tenements: Occupied Dwelling Houses.

The presentation relating to tenements shows for each city and town, and for each ward in a city, the total number of occupied dwelling houses, the number of occupied or unoccupied tenements in such houses, and also the total number of tenements whether occupied or not. The recapitulation appears on page 637, and, so far as the State at large is concerned, it shows that the 397,633 occupied dwelling houses contained 547,385

occupied tenements; the number of unoccupied tenements being 26,573, and the total number of tenements available for occupancy in occupied dwelling houses, 573,958. The occupied houses are presented so as to show the number of tenements in each. There were, for instance, 294,700 single tenements in the occupied houses, each, of course, being occupied by a single family; at the other end of the scale we find one occupied dwelling containing 42 tenements. The two-tenement occupied houses numbered 75,237; the three-tenement occupied houses, 18,469; the four-tenement occupied houses, 5,188; the five-tenement occupied houses, 1,607; the six-tenement occupied houses, 1,257; the seven-tenement occupied houses, 413; the eight-tenement occupied houses, 401; and the nine-tenement occupied houses, 109. From this point onward, as the number of tenements per house increases, the number of such houses rapidly decreases. The word "tenement" in this presentation is used in its broadest sense as indicating any place of abode, without regard to its character.

The facts as to the number of occupied and unoccupied tenements for the counties are summarized in the following analysis table:

The State, and Counties.	Number of Occupied Dwelling Houses	Number of Occupied Tenements in Occupied Dwelling Houses	Number of Unoccupied Tenements in Occupied Dwelling Houses	Total Number of Tenements in Occupied Dwelling Houses
THE STATE.	397,633	547,385	26,573	573,958
Barnstable,	7,476	8,069	162	8,231
Berkshire,	16,294	18,810	388	19,198
Bristol,	30,093	47,708	2,526	50,234
Dukes,	1,217	1,306	55	1,361
Essex,	54,234	74,092	2,803	76,895
Franklin,	8,177	9,637	337	9,974
Hampden,	23,072	32,793	1,441	34,234
Hampshire,	10,231	11,744	319	12,063
Middlesex,	86,596	107,654	4,122	111,776
Nantucket,	880	981	39	1,020
Norfolk,	25,789	29,685	814	30,499
Plymouth,	20,631	24,830	799	25,629
Suffolk,	65,604	112,802	8,800	121,602
Worcester,	47,339	67,274	3,968	71,242

The total number of tenements in occupied dwelling houses in Suffolk County was 121,602. These tenements were found in 65,604 occupied houses, the number of unoccupied tenements being 8,800. To contrast the facts shown in this county with those which appear in the county of Franklin, which is an agricultural county, we note that the total number of tenements in occupied houses in Franklin County was 9,974, found in 8,177 houses, the number of unoccupied tenements in such houses being 337. That is to say, in Suffolk County, which contains the city of Boston, the number of tenements in occupied houses approximated twice the number of houses, or, on the average, nearly two tenements to a house; while in Franklin County the number of tenements exceeded the number of houses by less than 22 per cent. In Middlesex County, to cite one of the most populous counties, in which, however, the figures are not affected by the conditions existing within the municipal limits of Boston, we find there were 111,776 tenements in 86,596 occupied dwellings, 4,122 of these being vacant at the date of the enumeration.

The facts as to the cities can be easily compared by means of the following table:

Cities.	Number of Occupied Dwelling Houses	Number of Occupied Tenements in Occupied Dwelling Houses	Number of Unoccupied Tenements in Occupied Dwelling Houses	Total Number of Tenements in Occupied Dwelling Houses
Beverly,	2,049	2,914	121	3,035
Boston,	58,599	103,306	8,243	111,549
Brockton,	5,355	7,700	360	8,060
Cambridge,	11,837	17,193	978	18,171
Chelsea,	4,743	6,934	482	7,416
Chicopee,	2,290	3,042	70	3,112
Everett,	3,610	4,304	231	4,535
Fall River,	8,069	17,948	1,146	19,094
Fitchburg,	3,886	5,686	260	5,946
Gloucester,	3,758	5,416	125	5,541
Haverhill,	4,814	6,902	349	7,251
Holyoke,	3,703	7,894	534	8,428
Lawrence,	6,735	10,783	227	11,010
Lowell,	11,933	16,885	848	17,733
Lynn,	10,045	14,144	773	14,917
Malden,	5,388	6,638	183	6,821
Marlborough,	2,341	3,159	115	3,274
Medford,	2,811	3,172	80	3,252
New Bedford,	7,480	12,221	569	12,790
Newburyport,	2,977	3,479	86	3,565
Newton,	5,102	5,528	80	5,608
North Adams,	2,986	3,931	92	4,023
Northampton,	2,824	3,270	74	3,344
Pittsfield,	3,806	4,342	75	4,417
Quincy,	3,801	4,373	155	4,528
Salem,	4,863	7,623	302	7,925
Somerville,	8,787	11,903	632	12,535
Springfield,	8,457	11,741	524	12,265
Taunton,	4,379	5,885	379	6,264
Waltham,	3,856	4,276	110	4,386
Woburn,	2,661	3,012	78	3,090
Worcester,	11,153	20,861	1,730	22,591

The city of Boston contained 111,549 tenements in occupied dwelling houses at the date of the enumeration, the number of such houses being 58,599. Of these tenements, 8,243 were unoccupied. These figures show that there were available for occupancy, on the average, nearly two tenements to each occupied house. Comparing these figures with those previously presented for the counties, we note that the city of Boston alone contained about the same number of tenements in its occupied dwelling houses as were found in the entire county of Middlesex; but the tenements in the occupied dwelling houses in Middlesex County, which numbered 111,776, were found in 86,596 houses, while, as we have said, the 111,549 tenements in Boston were found in 58,599 houses. It is exceedingly interesting to compare the different cities with respect to the tenements available for occupancy in the dwelling houses which were occupied at the date of the enumeration. While, as we have remarked, the tenements in the city of Boston average nearly two to each occupied house, we find in the city of Newton only 5,608 tenements in 5,102 houses, or slightly more than one tenement to a house on the average. In Newton, also, the number of unoccupied tenements in the occupied houses was but 80, or slightly less than one and one-half per cent of the total number of tenements; while, in the city of Boston, there were 8,243 unoccupied tenements, or about seven per

cent of the total number of tenements. In the city of Fall River, devoted to the cotton industry, there were found 19,094 tenements in 8,069 occupied houses, an average of 2.37 per house; in Holyoke, 8,428 tenements in 3,703 houses, an average of 2.28 per house; in Lynn, 14,917 tenements in 10,045 houses, an average of 1.49 per house; in Lowell, 17,733 tenements in 11,933 houses, an average of 1.49 per house; and in Lawrence, 11,010 tenements in 6,735 houses, an average of 1.63 per house. These cities are all devoted to manufacturing. In Malden, there were only 6,821 tenements in 5,388 houses, an average of 1.27 per house; in Medford, 3,252 tenements in 2,811 houses, an average of 1.16 per house; and in Waltham, 4,386 tenements in 3,856 houses, an average of 1.14 per house. These cities, like Newton, are largely residential. As the cities increase in size, the tendency to increase the number of tenements per house is clearly shown in the table, and the larger number of tenements per house found in the manufacturing cities as compared with the residential cities is also plainly apparent.

The final table contrasts the cities and towns with respect to tenements.

Classification.	Number of Occupied Dwelling Houses	Number of Occupied Tenements in Occupied Dwelling Houses	Number of Unoccupied Tenements in Occupied Dwelling Houses	Total Number of Tenements in Occupied Dwelling Houses
THE STATE.	397,633	547,385	26,573	573,958
Cities, ...	225,098	346,465	20,011	366,476
Towns, ...	172,535	200,920	6,562	207,482

The cities as a whole contained 366,476 tenements, found in 225,098 occupied dwelling houses, an average of 1.63 per house, while the towns contained 207,482 tenements, found in 172,535 houses, an average of 1.20 per house. In the State, as a whole, there were 573,958 tenements, found in 397,633 occupied houses, an average of 1.44 per house. In the cities, 20,011 tenements in occupied houses were entirely unoccupied, or 5.46 per cent of the total number of tenements in such houses. In the towns, 6,562 unoccupied tenements were found in occupied houses, or 3.16 per cent of the total number of tenements in such houses.

Dwelling Houses: Number of Stories and Materials.

The presentation relating to dwelling houses correlates the information as to occupied and unoccupied dwellings with other data showing the number of stories and materials of construction. This information is presented fully in the table for each town and city. The recapitulation for the State, pages 738 to 741, shows that the total number of one-story houses was 13,613; those having one story and an attic numbering 109,309; while the basement and one-story houses numbered 639. There were 5,600 houses having a basement, a single story, and an attic. The two-story houses numbered 77,734; those having two stories and an attic, 151,818; while the basement and two-story houses numbered 4,558. There were 7,835 houses having a basement, two stories, and an attic. The three-story houses numbered 36,281, while the houses having three stories and an attic numbered 4,200, and those having a basement and three stories 5,807. There were also 2,238 houses having a basement, three stories, and an attic. The four-story houses numbered 4,456, and there were 2,627 having a basement and four stories, while 294 had four stories and an attic, and 173, a basement, four stories, and an attic. The houses of five stories numbered 600, and those having a basement and five stories, 329. There were also 61 six-story houses, 67 having a basement and six stories, 11 seven-story houses, seven having a basement and seven stories, six eight-story houses, one having a basement and eight stories, and a few others of different

combinations which are fully shown in the table. Under the classification employed, the most numerous classes are the houses having one story and an attic, which numbered 109,309, those having two stories, which numbered 77,734, and those having two stories and an attic, which numbered 151,818.

The data as to the material of which the 428,494 dwelling houses were constructed are brought forward in the following series of analysis tables. The first gives the figures for the occupied dwelling houses in the cities and towns and also in the State for 1895, placed in comparison with the figures for the Census of 1885 for the same cities and towns.

Occupied Dwelling Houses: Materials of which Constructed.	The State		Cities		Towns	
	1885	1895	1885	1895	1885	1895
Wood,	284,606	365,933	139,820	197,220	144,786	168,713
Brick,	24,038	26,041	22,208	23,648	1,830	2,393
Stone,	567	815	427	590	140	225
Cement,	127	44	114	36	13	8
Wood and brick,	608	2,667	317	1,794	291	873
Wood and stone,	44	503	17	328	27	175
Wood and cement,	6	19	3	10	3	9
Brick and stone,	237	1,371	223	1,308	14	63
Brick and cement,	7	60	7	57	–	3
Stone and cement,	3	16	2	9	1	7
Wood, brick, and stone,	5	25	3	12	2	13
Not given,	–	139	–	86	–	53
Totals,	310,248	397,633	163,141	225,098	147,107	172,535

From this table we learn that in 1895 there were, in the State, 365,933 occupied dwelling houses constructed of wood, 197,220 of these being in the cities and 168,713 in the towns. Of the 26,041 occupied dwelling houses built of brick, 23,648 were found in the cities and but 2,393 in the towns.

The second analysis table shows the number of unoccupied dwelling houses in the cities and towns and in the State and the materials of which constructed.

Unoccupied Dwelling Houses: Materials of which Constructed.	The State		Cities		Towns	
	1885	1895	1885	1895	1885	1895
Wood,	13,352	28,812	3,393	11,297	9,959	17,515
Brick,	1,090	1,431	958	1,211	132	220
Stone,	81	100	58	64	23	36
Cement,	11	2	8	2	3	–
Wood and brick,	19	142	3	79	16	63
Wood and stone,	3	93	–	27	3	66
Wood and cement,	–	7	–	4	–	3
Brick and stone,	24	201	23	178	1	23
Brick and cement,	–	10	–	7	–	3
Stone and cement,	–	1	–	–	–	1
Wood, brick, and stone,	–	5	–	1	–	4
Not given,	–	57	–	40	–	17
Totals,	14,580	30,861	4,443	12,910	10,137	17,951

There were 28,812 unoccupied dwelling houses built of wood in the State in 1895, of which 11,297 were in the cities and 17,515 in the towns.

The third table shows equivalent facts for both occupied and unoccupied dwelling houses for the cities and towns and for the State.

Total Dwelling Houses: Materials of which Constructed.	The State		Cities		Towns	
	1885	1895	1885	1895	1885	1895
Wood,	297,958	394,745	143,213	208,517	154,745	186,228
Brick,	25,128	27,472	23,166	24,859	1,962	2,613
Stone,	648	915	485	654	163	261
Cement,	138	46	122	38	16	8
Wood and brick,	627	2,809	320	1,873	307	936
Wood and stone,	47	596	17	355	30	241
Wood and cement,	6	26	3	14	3	12
Brick and stone,	261	1,572	246	1,486	15	86
Brick and cement,	7	70	7	64	–	6
Stone and cement,	3	17	2	9	1	8
Wood, brick, and stone,	5	30	3	13	2	17
Not given,	–	196	–	126	–	70
Totals,	324,828	428,494	167,584	238,008	157,244	190,486

From the above table it is seen that of the total number of dwelling houses in the State, namely, 428,494, there were 394,745 which were constructed of wood. Of these, 208,517 were located in cities, and 186,228 in towns. These figures show how largely wood is used in Massachusetts as a material of construction for dwellings, and they also show that in this respect the cities form no exception to the towns; indeed, the number of wooden houses within city limits exceeds, as will be seen, the number in the towns. The number of brick houses in the State is 27,472, and of these the cities contain by far the larger part, the aggregate number of such houses in the cities being 24,859, while brick houses in the towns number only 2,613. There were found only 915 houses constructed entirely of stone. Of these, 654 were in the cities and 261 in the towns. The other combinations of materials presented in the table need not be particularly referred to, as they are plainly apparent.

The arrangement of the table enables comparisons to be made between the facts for 1885 and those of the present Census. For example, the total number of houses has risen in the decade from 324,828 to 428,494, an increase of 31.91 per cent. The houses within city limits have increased from 167,584 to 238,008, an increase of 42.02 per cent; while those in towns have increased from 157,244 to 190,486, an increase of 21.14 per cent. In the State at large the wooden houses have increased from 297,958 to 394,745, an increase of 32.48 per cent; the brick houses from 25,128 to 27,472, an increase of 9.33 per cent; and the stone houses from 648 to 915, an increase of 41.20 per cent. While the use of brick in the construction of dwelling houses, so far as shown by the number of houses constructed of that material in the cities, does not show so great a gain as is shown by the increase in houses of all kinds, nevertheless, in the towns, the gain in brick houses is greater than the gain in houses of all kinds. For example, the number of brick houses in cities has increased in the decade from 23,166 to 24,859, an increase of 7.31 per cent, while in the towns, they have increased from 1,962 to 2,613, a gain of 33.18 per cent.

The next table presents a comparison of occupied, unoccupied, and total dwelling houses in the counties for the years 1885 and 1895.

The State, and Counties.	Occupied Dwelling Houses		Unoccupied Dwelling Houses		Total Dwelling Houses	
	1885	1895	1885	1895	1885	1895
THE STATE.	310,248	397,633	14,580	30,861	324,828	428,494
Barnstable,	7,585	7,476	803	1,620	8,388	9,096

Franklin,	7,290	8,177	467	684	7,757	8,861
Hampden,	17,853	23,072	469	1,395	18,322	24,467
Hampshire,	8,847	10,231	348	498	9,195	10,729
Middlesex,	60,600	86,596	2,139	6,223	62,739	92,819
Nantucket,	999	880	202	420	1,201	1,300
Norfolk,	19,321	25,789	806	1,916	20,127	27,705
Plymouth,	16,463	20,631	1,676	3,040	18,139	23,671
Suffolk,	51,108	65,604	2,021	4,485	53,129	70,089
Worcester,	39,051	47,339	1,480	2,865	40,531	50,204

The occupied dwelling houses in 1895 in the State as a whole numbered 397,633, or 92.80 per cent of the total number of houses shown in the table; in 1885, they numbered 310,248, or 95.51 per cent of the total number of houses. On the other hand, there were, of course, 7.20 per cent of the total houses unoccupied in 1895, and 4.49 per cent unoccupied in 1885. Similar comparisons for each of the counties may be made from the table.

In the following table, similar data are presented for the cities:

Cities.	Occupied Dwelling Houses		Unoccupied Dwelling Houses		Total Dwelling Houses	
	1885	1895	1885	1895	1885	1895
Beverly,	1,509	2,049	122	216	1,631	2,265

Worcester,	8,053	11,153	70	461	8,123	11,614

Without reproducing the figures, we merely point out that 94.33 per cent of the total dwelling houses in the city of Boston were occupied in 1895, and 96.78 per cent in 1885. Selecting a few of the leading manufacturing cities, the following percentages result from the data contained in the table: In Fall River, 97.48 per cent of the dwelling houses were occupied in 1895, and 98.98 per cent in 1885; in Worcester, 96.03 per cent were occupied in 1895, and 99.14 per cent in 1885; in Holyoke, 95.19 per cent were occupied in 1895, and 98.20 per cent in 1885; in Lowell, the occupied dwelling houses constituted 96.02 per cent of the total number in 1895, and 95.43 per cent in 1885. These and similar comparisons may be carried to any extent by means of the figures contained in the table, but it is not necessary to enlarge upon them here.

The final table presents the data for the cities and towns in the aggregate so as to be compared with each other and with the aggregates for the State.

Classification.	Occupied Dwelling Houses		Unoccupied Dwelling Houses		Total Dwelling Houses	
	1885	1895	1885	1895	1885	1895
THE STATE.	310,248	397,633	14,580	30,861	324,828	428,494
Cities,	163,141	225,098	4,443	12,910	167,584	238,008
Towns,	147,107	172,535	10,137	17,951	157,244	190,486

In the cities as a whole, 94.58 per cent of the total number of dwelling houses were occupied in 1895, as against 97.35 per cent occupied in 1885; in the towns, on the other hand, 90.58 per cent were occupied in 1895, as against 93.55 per cent in 1885.

Tabular Analysis.

Pages

Averages and Comparative Totals: Rooms, Tenements, and Dwelling Houses, ... 755–782

The presentation entitled "Averages and Comparative Totals: Rooms, Tenements, and Dwelling Houses," brings together the leading facts as to the number of families, occupied and unoccupied dwelling houses, occupied and unoccupied tenements, and occupied and unoccupied rooms, with averages showing males to a family, females to a family, persons to a family, persons to each occupied dwelling house, estimated population of unoccupied dwelling houses, estimated population of unoccupied tenements in occupied dwelling houses, estimated population if all dwelling houses were fully occupied, families to each occupied dwelling house, persons to each occupied tenement, rooms to each occupied tenement, and persons to each room in the occupied tenements. The recapitulation for the State, by counties, appears on pages 780, 781. The estimates referred to above have, of course, been based upon the ascertained facts; that is, the estimated population of the unoccupied dwelling houses has been based upon the average number of persons found in the occupied dwelling houses, and the other estimates have been made up in a similar manner.

Taking the first line of the recapitulation, which presents the facts for the State, and disregarding the figures showing population, families, and dwelling houses, which are comprised in the first 13 columns of the table and which have been alluded to in the analysis of previous tables, we note that the average number of males to a family for the State is 2.22, and the average number of females 2.35, the average number of persons of both sexes being 4.57. The average number of persons to an occupied dwelling is 6.29. The estimated population of the unoccupied dwelling houses, based upon this last figure, is 194,116, and the estimated population of the unoccupied tenements in the occupied dwelling houses is 121,439. These two estimates aggregate 315,555, which is the estimated population that could be housed in the dwelling houses found entirely unoccupied and in the unoccupied tenements of occupied dwelling houses. This number of persons, added to the total population of the State, namely, 2,500,183, gives an estimated population of 2,815,738, if the dwelling houses and tenements which were unoccupied at the time of the enumeration were as fully occupied as the occupied dwelling houses and tenements. That is to say, this figure represents the population that could be housed in the houses and tenements at present existing, without more crowding than is found in the tenements that are at present occupied. This indicates the limit of expansion within the present tenements available for housing the people, without diminishing the average space occupied by each family. A similar estimate appears for each county, and the estimates may be compared with the actual population shown in the third column of the table. In such a comparison some remarkable differences are disclosed. In Suffolk County, for example, the actual population was 539,799. The estimated population, if all dwelling houses were fully occupied, is 618,863, an increase of 14.65 per cent. In Dukes County, on the other hand, the actual population was 4,238, while, if all the dwelling houses were fully occupied, the population would become 8,221, an increase of 93.98 per cent. This

possible increase in Dukes County is larger than in any other, and is partly due to the existence of numerous vacant houses at the time of the enumeration, intended for summer occupancy only, and which later in the season would have been filled with temporary residents.

The percentages of possible increase in population within the limits of the dwelling houses and tenements already existing, without increasing the families and persons to each occupied dwelling house and tenement, beyond the averages shown in the table, may be seen from the following statement for each of the counties and for the State:

The State, and Counties.	Actual Population	Estimated Population if all Dwelling Houses were fully Occupied	Percentages of Possible Increase
THE STATE.	2,500,183	2,815,738	12.62
Barnstable,	27,654	34,204	23.69
Berkshire,	86,292	94,014	8.95

The United States Census for 1890 presented for each leading city in the country a statement showing the number of occupied dwellings, number of families, and the average number of persons to a dwelling and to a family. This information is given in the following table, in order that the figures may be compared with the facts obtained for the cities in Massachusetts in the present Census:

Cities.	United States Census — 1890			
	Number of Occupied Dwellings	Number of Families	Persons to an Occupied Dwelling	Persons to a Family
Albany, N. Y.,	13,153	20,433	7.22	4.65

Wilmington, Del.,	11,878	12,473	5.17	4.93

The average number of persons to a family in the city of Boston is 4.81. This average was exceeded in 1890 in the following cities: Allegheny, Atlanta, Baltimore, Buffalo, Charleston, Chicago, Cleveland, Columbus, Denver, Detroit, Evansville, Kansas City, Lincoln, Louisville, Memphis, Milwaukee, Minneapolis, Nashville, New Orleans, New York, Omaha, Philadelphia, Pittsburg, Richmond, Rochester, San Francisco, Scranton, St. Joseph, St. Louis, St. Paul, Trenton, Washington, and Wilmington. The average number of persons to each occupied dwelling house in Boston is 8.48. The average number of persons to an occupied dwelling was larger than this in 1890 in the following cities: Brooklyn, Chicago, Cincinnati, Jersey City, and New York. The marked difference between the conditions existing in the city of New York and the other cities mentioned in the table is perhaps the most striking feature of the comparison. In New York the average number of persons to an occupied dwelling was 18.52; the largest average number of persons found to an occupied dwelling in any other city is shown in Brooklyn, where the average was 9.80. The cities of Fall River and Holyoke, however, contained a larger average number of persons to an occupied dwelling house than was found in the city of Brooklyn, or than was found in any of the cities shown except New York, these averages, respectively, being 11.06 and 10.89. Excluding Brooklyn

and New York from the table derived from the United States Census, we find that the city which had the next largest average number of persons to an occupied dwelling is Cincinnati, the average being 8.87. This is larger than the average number of persons to an occupied dwelling house in the city of Boston, and approximately the same as the average number of persons to an occupied dwelling found in Worcester, namely, 8.86. Jersey City had an average of 8.78 persons to an occupied dwelling, and Chicago an average of 8.60, while an average of 8.12 was found in the city of Hartford. Below these cities, the city having the largest average number of persons to an occupied dwelling was Paterson, the average being 7.94. The average in the city of Albany was 7.22; in Newark, 7.81; in New Haven, 7.26; in Providence, 7.49; in St. Louis, 7.41; and in Troy, 7.81. The cities in Massachusetts in which these figures are approximated are: Chicopee, 7.17; Gloucester, 7.51; Lawrence, 7.75; Lowell, 7.07; New Bedford, 7.39; and Salem, 7.09. Other comparisons may be made from the tables.

The number of occupied dwellings, number of families, average number of persons to an occupied dwelling, and the average number of persons to a family, in each of the States and Territories, according to the United States Census of 1890, are shown in the following table:

States and Territories.	United States Census — 1890

In Massachusetts in 1890, according to this table, there were 355,280 occupied dwellings containing 479,790 families. The average number of persons to a dwelling was 6.30, and the average number of persons to a family, 4.67. We have seen that in the present Census the number of occupied dwellings becomes 397,633, and the number of families 547,385, while the average number of persons to each occupied dwelling house is 6.29, approximately the same as was shown to each occupied dwelling in the Census of 1890; the average number of persons to a family now being 4.57, as against 4.67, the figure shown in 1890. The average number of persons shown in the present Census to each occupied dwelling house exceeds the average number per dwelling found in any State in the Census of 1890 except in the States of New York and Rhode Island, where the averages were, respectively, 6.70 and 6.61. The average number of persons to a family in Massachusetts, as shown by the present Census, is exceeded by the average number of persons to a family shown by the Census of 1890 in the following States, the average in each case being annexed: Alabama, 5.27; Arkansas, 5.28; California, 4.92; Colorado, 4.89; Delaware, 4.87; District of Columbia, 5.24; Florida, 4.89; Georgia, 5.22; Idaho, 4.66; Illinois, 4.92; Indiana, 4.69; Iowa, 4.92; Kansas, 4.80; Kentucky, 5.24; Louisiana, 5.22; Maryland, 5.16; Michigan, 4.60; Minnesota, 5.25; Mississippi, 5.35; Missouri, 5.07; Montana, 4.81; Nebraska, 5.12; New Jersey, 4.69; New York, 4.59; North Carolina, 5.27; North Dakota, 4.75; Ohio, 4.68; Oregon, 4.92; Pennsylvania, 4.95; Rhode Island, 4.61; South Carolina, 5.16; South Dakota, 4.68; Tennessee, 5.29; Texas, 5.44; Utah, 5.36; Virginia, 5.44; Washington, 4.92; West Virginia, 5.43; Wisconsin, 5.03; and Wyoming, 5.03. That is to say, in 40 States, nearly the whole number, the average number of persons to a family, as shown by the Census of 1890, exceeds the average number of persons to a family shown in Massachusetts by the present Census. The average number of persons to a family in the United States as a whole was 4.93, which is also in excess of the average shown in Massachusetts.

The recapitulation on pages 780, 781 gives an interesting table of averages per areas, or, in other words, distributes the population according to the area of land surface, and also shows the number of acres and square feet to each person, and to each family and dwelling, for the State and for each county.

Referring to the first line of this recapitulation, we find that the State has an area

of 8,040 square miles, this being the land surface only. The average number of persons to a square mile is 310.97, and the average number of families to a square mile 68.08. The average number of dwellings to each square mile, including both occupied and unoccupied dwelling houses, is 53.30. This apportionment of land area, allows, on the average, 2.06 acres to each person, 9.40 acres to each family, and 12.01 acres to each dwelling; or 89,650 square feet of land area to each person, 409,478 square feet to each family, and 523,093 square feet to each dwelling. In the county of Suffolk each person has, on the average, an allotment of 2,272 square feet, each family has 10,874 square feet, and each dwelling 17,501 square feet. These, of course, are the most limited areas found in the State. At the other extremity of the scale stands the county of Dukes, comprising the island of Martha's Vineyard and the islands within the town of Gosnold. Here each person has, on the average, 789,384 square feet, each family 2,561,568 square feet, and each dwelling 1,448,229 square feet; or, on the average, 18.12 acres to each person, 58.81 acres to each family, and 33.25 acres to each dwelling. These figures are approximated in the counties of Franklin and Nantucket, while the most limited areas, except in the county of Suffolk, are found in the counties of Essex, Middlesex, and Bristol. If the comparison is based on the average number of square feet to each person, these three counties rank in the order named.

A comparison of areas for the State as shown by the Censuses of 1885 and 1895 is presented in the following table:

Classification.	1885	1895
Area* (square miles),	8,040	8,040
Persons to a square mile,	241.56	310 97
Families to a square mile,	52.79	68.08
Dwellings† to a square mile,	40.40	53.30
Acres to a person,	2.65	2.06
Acres to a family,	12.12	9.40
Acres to a dwelling,†	15.84	12.01
Square feet to a person,	115,410	89,650
Square feet to a family,	528,121	409,478
Square feet to a dwelling,†	690,034	523,093

* Land surface only. † Includes both occupied and unoccupied dwelling houses.

The area of the State in square miles, including land surface only, is, of course, the same in 1895 as in 1885. The number of persons to a square mile in 1895 is 310.97, as against 241.56 in 1885. The average number of families to a square mile, which in 1885 was 52.79, has risen to 68.08. The number of dwellings to a square mile, including both occupied and unoccupied dwellings, has risen from 40.40 to 53.30. On the average, each person in the Commonwealth had an allotment of 2.65 acres in 1885, but in 1895 this has fallen to 2.06. The average number of acres to a family, which in 1885 was 12.12, has fallen to 9.40. The average number of acres to a dwelling has fallen from 15.84 to 12.01. On the average, each person in 1885 occupied 115,410 square feet, but under the increase in population, each person now has, on the average, only 89,650 square feet. The number of square feet to a family has fallen from 528,121 to 409,478, and the average number of square feet to each dwelling, from 690,034 to 523,093. This comparison shows quite clearly the effect of the increase of population upon a territory which is incapable of expansion, and while the comparisons which have been made in connection with previous tables indicate that undue concentration of the population is still confined to limited areas and to a few sections in certain cities and towns, it is, nevertheless, true that the area available to each person is, as a matter of averages, constantly growing smaller, and that the decrease, when measured at intervals of 10 years, is quite material.

NOTE. — On page 803, at the close of the presentation for native and foreign born, two recapitulations are given, one for the State, and the other for the State and Counties, by sex. In the first recapitulation, the total population is taken as the basis for figuring percentages for native born and foreign born, and the number of native born and foreign born males and native born and foreign born females. In the second recapitulation, the whole number of males is taken as 100 per cent in figuring the percentages of native born and foreign born males, and the whole number of females is taken as 100 per cent in figuring the percentages of native born and foreign born females. The use of these different bases causes a slight variation in the percentages for the State in the two recapitulations, and this explanation is supplied in order that these variations may not be considered errors in computation.

The same variations occur in the percentages on page 827, at the close of the presentation for color and race, and in the tables above on this page, the explanation of these variations previously given being equally applicable thereto.

Tabular Analyses

For the Following Presentations:

	Pages
Native and Foreign Born,	791-804
Color and Race,	805-828
Conjugal Condition,	829-852
Soldiers, Sailors, and Marines,	853-858

Native and Foreign Born.

The presentation showing the population classified as native and foreign born, for each town and city, is contained on pages 791 to 802. The recapitulation, to which we shall allude in this analysis, appears on page 803. So far as the State at large is concerned, this recapitulation shows that the native born persons number 1,735,253, of whom 848,312 are males and 886,941 females. The foreign born number 764,930, of whom 366,389 are males and 398,541 are females. Expressed in percentages, the native born constitute 69.41 per cent, or about 69 persons in every 100, of the total population, while the foreign born constitute 30.59, or about 31 persons in every 100, of the total population. The native born males constitute 33.93 per cent, and the native born females 35.48 per cent of the total population, while the foreign born males constitute 14.65 per cent, and the foreign born females 15.94 per cent of the total population. The percentage of foreign born persons varies considerably in the different counties, being largest in the county of Bristol, where it reaches 38.40, and smallest in the county of Nantucket, where it is but 8.29. The percentages in the different counties are shown in the recapitulation. From them we may note that about 62 persons in every 100 (61.60 per cent), in the county of Bristol, are native born; and taking the other counties in order, beginning with the lowest and closing with the highest, we obtain the following statement as to the number of native born persons in every 100 of the population: Suffolk County, about 64 (64.12 per cent); Middlesex County, about 69 (68.62 per cent); Hampden County, about 69 (68.67 per cent); Essex County, about 71 (70.73 per cent); Worcester County, about 71 (71.02 per cent); Norfolk County, about 74 (73.72 per cent); Hampshire County, about 76 (76.40 per cent); Berkshire County, about 77 (77.30 per cent); Plymouth County, about 82 (81.64 per cent); Franklin County, about 83 (83.19 per cent); Dukes County, about 88 (88.23 per cent); Barnstable County, about 89 (89.14 per cent); while in the county of Nantucket, consisting of the insular town of Nantucket, the native born number about 92 in every 100 (91.71 per cent).

The following table shows the number of native and foreign born persons in the State and in each of the counties in 1895, and also, for purposes of comparison, in 1885, with percentages:

The State, and Counties.	Number				Percentages			
	1885		1895		1885		1895	
	Native Born	Foreign Born	Native Born	Foreign Born	Native Born	Foreign Born	Native Born	Foreign Born

Nantucket,	2,973	169	2,766	250	94.62	5.38	91.71	8.29
Norfolk,	78,830	23,312	99,386	35,433	77.18	22.82	73.72	26.28
Plymouth,	70,638	11,042	82,860	18,638	86.48	13.52	81.64	18.36
Suffolk,	279,988	141,121	346,108	193,691	66.49	33.51	64.12	35.88
Worcester,	182,175	61,864	217,635	88,810	74.65	25.35	71.02	28.98

From this table the increase in the number of foreign born during the decade is clearly seen. Confining our comparison to percentages, we find that in the State, as a whole, the percentage of foreign born has risen from 27.13 to 30.59. In each of the counties an increase is noted, although in the county of Berkshire the change is very slight, the percentage in 1885 being 22.20 and in 1895, 22.70. In the other counties the increases in percentages are as follows: Barnstable, 8.84 to 10.86; Bristol, 32.73 to 38.40; Dukes, 6.43 to 11.77; Essex, 24.83 to 29.27; Franklin, 14.71 to 16.81; Hampden, 30.16 to 31.33; Hampshire, 21.77 to 23.60; Middlesex, 28.39 to 31.38; Nantucket, 5.38 to 8.29; Norfolk, 22.82 to 26.28; Plymouth, 13.52 to 18.36; Suffolk, 33.51 to 35.88; and Worcester, 25.35 to 28.98. With respect to the native born, we may base the following statement on the percentages shown in the table: the number of native born in the State is now about 69 in every 100, as against about 73 in every 100 in 1885; in Barnstable County the number of native born persons in every 100 shows a decline in 1895 as compared with 1885 from about 91 to about 89; in Berkshire, from about 78 to about 77; in Bristol, from about 67 to about 62; in Dukes, from about 94 to about 88; in Essex, from about 75 to about 71; in Franklin, from about 85 to about 83; in Hampden, from about 70 to about 69; in Hampshire, from about 78 to about 76; in Middlesex, from about 72 to about 69; in Nantucket, from about 95 to about 92; in Norfolk, from about 77 to about 74; in Plymouth, from about 86 to about 82; in Suffolk, from about 66 to about 64; and in Worcester, from about 75 to about 71.

A comparison for the cities may be made from the following table:

Each of the cities shows an increase in the percentage of foreign born in 1895 as compared with 1885, except Holyoke, Marlborough, Northampton, Pittsfield, and Woburn. In the following cities, however, this increase is very slight, the percentages for each period being annexed: Fall River, from 49.16 to 49.91; Medford, from 23.38 to 25.02; Newburyport, 19 to 20.34; North Adams, 27.04 to 28.58; Springfield, 23.79 to 24.64; Taunton, 27.75 to 28.67; and Waltham, from 27.47 to 29.08. The city which shows the greatest increase in the percentage of foreign born is the city of New Bedford, in which city the percentage has increased from 30.71 to 41.11. A considerable increase is also shown in the cities of Fitchburg, Everett, and Gloucester. In Fitchburg, the percentage has increased from 23.98 to 34.31; in Everett, from 20.86 to 28.73; and in Gloucester, from 32.32 to 40.17. The decreases in the percentages of foreign born in the cities which show a decline are as follows: Holyoke, from 49.79 to 44.83; Marlborough, 26.17 to 25.55; Northampton, 26.01 to 24.98; Pittsfield, 23.32 to 22.23; and Woburn, 30 to 29.73. In the cities in the aggregate, 34.86 per cent of the total population is foreign born in 1895 as compared with 32.03 per cent in 1885. In the towns of the Commonwealth, 22.53 per cent of the total population is foreign born as against 19.46 per cent in 1885.

The following analysis table presents the population of the city of Boston by wards, classified as native born and foreign born:

City of Boston.	Total Population	Native Born	Foreign Born	Percentages of Total Population	
				Native Born	Foreign Born
Boston,	496,920	316,522	180,398	63.70	36.30
Males,	239,666	156,241	83,425	31.44	16.79

Females,	7,708	5,167	2,541	34.44	16.94

Bearing in mind that the foreign born population of the city as a whole constitutes 36.30 per cent of the total population, or, in other words, that about 36 persons in every 100 of the total population are foreign born, we note that this percentage is exceeded in the following wards, the percentages being in each case annexed: ward 2, 42.68; ward 6, 56.82; ward 7, 45.27; ward 8, 48.01; ward 9, 40.91; ward 13, 44.02; ward 18, 39.23; and ward 19, 39.79. The ward which has the largest percentage of foreign born is ward 6, which includes what is popularly known as the North-End District. Here the foreign born constitute nearly 57 in every 100 of the total population. On the other hand, ward 21 has the smallest percentage of foreign born, namely, 26.08, or about 26 persons in every 100 of the total population. This is nearly paralleled in ward 24, where the foreign born number about 27 in every 100 of the total population, or 27.39 per cent.

It may be interesting to compare the percentages of foreign born in different districts of the city. Wards 1 and 2 constitute East Boston, including also the islands in the harbor. The total population of these wards and islands is 42,595, the number of foreign born being 16,564, or about 39 persons in every 100 (38.89 per cent). Wards 3, 4, and 5 constitute the Charlestown District, the total population being 40,304, of which 12,680 are foreign born, or about 31 persons in every 100 (31.46 per cent). South Boston includes wards 13, 14, and 15, with a small part of ward 16. The total population of the district is 67,913, of which it is estimated that 24,692 are foreign born, or about 36 persons in every 100 (36.36 per cent). The Back Bay territory, so called, is rather indefinitely bounded, but portions of wards 10 and 11 fall within this section, the estimated population of the district being 21,244, of which it is estimated that 6,862 are foreign born, or about 32 persons in every 100 (32.30 per cent). Ward 25 comprises the

Brighton District. Here the total population is 15,001, the foreign born numbering 4,763, or about 32 persons in every 100 (31.75 per cent). West Roxbury comprises the whole of ward 23 and part of ward 22. In these wards, respectively, the foreign born population constitutes 32.90 per cent and 34.11 per cent of the total population, or from 33 to 34 persons in the 100. Wards 20 and 24, with a part of ward 16, make up the Dorchester District. In these wards, respectively, the foreign born population constitutes 27.84, 27.39, and 29.51 per cent of the total population, or from about 27 to 30 persons in every 100. Wards 17, 18, 19, 21, and a part of ward 22 comprise Roxbury. In ward 17, the foreign born constitute 35.10 per cent of the total population, or about 35 persons in every 100; in wards 18 and 19, respectively, the percentages are 39.23 and 39.79, or from about 39 to 40 persons in every 100; in ward 21 the percentage is 26.08, or about 26 persons in the 100; while in ward 22 the percentage is 34.11, or about 34 persons in the 100. In nearly every ward the foreign born males and the foreign born females form percentages of the total population which do not differ very widely, but an exception is found in ward 11, a large part of which falls within the Back Bay territory. Here the males who are foreign born constitute 8.45 per cent of the total population, while the females constitute 26.35 per cent of the total population, this excess of females being undoubtedly due to the fact of the presence in that ward of a considerable number of foreign born females engaged in domestic service. The subject of the foreign influence upon the growth of the city, as well as its influence upon the growth of the entire population of the State, will be further treated in discussing the tables relating to place of birth and parent nativity, to be hereafter presented.

Color and Race.

The presentation, pages 805 to 828, shows the distribution of the population by color and race. The recapitulation is contained upon page 827. The entire white population of the State is 2,471,418; colored, 26,540; Indian, 519; Japanese, 34; and Chinese, 1,672. Expressed in percentages, 98.85 per cent is white, 1.06 colored, 0.02 Indian, 0.07 Chinese, while the Japanese comprise less than one one-hundredth of one per cent. The white males number 1,199,920, or 47.99 per cent of the total population, and the white females 1,271,498, or 50.86 per cent of the total population. The colored males number 12,813 and the colored females 13,727, or 0.51 per cent and 0.55 per cent, respectively, of the total population. The Indian males number 279 and the Indian females 240, each constituting one one-hundredth of one per cent of the total population. Eight Japanese females and nine Chinese females appear in the enumeration. The percentages of white persons of the total population do not greatly vary in the different counties, rising from 93.11 in the county of Dukes to 99.68 in the county of Franklin. The percentage of colored persons of the total population is largest in the county of Dukes, this percentage being 3.33, and next largest in Nantucket and Suffolk, in which counties the percentages of colored persons are 1.99 and 1.90, respectively. In the following counties, besides those named, the percentage of colored persons of total population rises above one per cent: Barnstable, 1.26; Berkshire, 1.48; Bristol, 1.10; and Middlesex, 1.10. No Indians were enumerated in the county of Nantucket, while the Indian population was less than one one-hundredth of one per cent of the total population in the counties of Essex, Hampden, Middlesex, Suffolk, and Worcester. The largest percentage of Indians was found in the county of Dukes, namely, 3.47. No Japanese were found in Barnstable, Berkshire, Bristol, Dukes, or Nantucket counties, while the Japanese population did not exceed one one-hundredth of one per cent in any county, and was less than one one-hundredth of one per cent in the counties of Essex, Hampden, Middlesex, Norfolk, Plymouth, Suffolk, and Worcester. The largest number of Chinese was found in the county of Suffolk, where persons of this race constituted 0.16 per cent of the total population. No Chinese were enumerated in the county of Nantucket.

Conjugal Condition.

The distribution of the population according to conjugal condition appears in the table on pages 829 to 852, the recapitulation being found upon page 851. The num-

ber of single persons enumerated was 1,385,030, or 55.40 per cent of the total population; the number of married persons being 943,245, or 37.73 per cent of the total population. The widowed* number 165,650, or 6.62 per cent of the total population; the divorced, 4,450, or 0.18 per cent of the total population; while there were 1,808 persons for whom the facts as to conjugal condition could not be ascertained, constituting, however, but seven one-hundredths of one per cent of the total population. The single males number 696,050, or 27.84 per cent of the total population, and the single females 688,980, or 27.56 per cent of the total population. It will be seen, therefore, that upon the basis of percentages of the total population, no great difference appears between the sexes among the single persons. This is also true with respect to the married persons, who include 471,437 males and 471,808 females, constituting, respectively, 18.86 and 18.87 per cent of the total population. The widowed females number 121,421, or 4.86 per cent of the total population, a number greatly in excess of the males included under this head who aggregate 44,229, or 1.76 per cent of the total population. The divorced persons include 1,672 males and 2,778 females; while the persons whose conjugal condition was unknown were very largely males, who number in the aggregate 1,313 as against 495 females of this class. The percentage which the single persons constitute of the total population is largest in the county of Suffolk, this percentage being 57.06, and smallest in the county of Nantucket, namely, 42.54. The percentage which the widowed persons constitute of the total population is largest in the county of Nantucket, namely, 13.76. In Dukes County the percentage of widowed persons of the total population is 10.17, the next largest percentage, namely, 9.13, being found in the county of Barnstable. The percentage of widowed persons of the total population is smallest in the county of Bristol, namely, 6.20, although this varies but slightly from the percentages found in several other counties, and in the State as a whole. In no county does the proportion of divorced persons rise so high as one per cent.

Soldiers, Sailors, and Marines.

The table, pages 853 to 858, shows the total number of persons living in the Commonwealth on May 1, 1895, who served as either soldiers, sailors, or marines, in the War of the Rebellion, with aggregates. The recapitulation for the State appears on page 858, from which it will be seen that at the time of the enumeration there were living in Massachusetts, 36,081 soldiers of the late war, 2,750 sailors, and 700 marines, or, in the aggregate, 39,531 veterans of the different branches of the service. The distribution of these persons, by counties, is also shown in the recapitulation, but need not be especially pointed out here.

The returns included a certain number of persons under more than one designation; for example, "soldier and marine," "soldier and sailor," etc. To avoid duplications in presentation, however, all such persons appear in the table under the single head "soldier." The number designated as soldiers, therefore, includes some who were enrolled in other branches of the service, besides having served in the army. It is possible, also, that wives on account of a failure to understand clearly the nature of the inquiry, which was applicable only to survivors of the War of the Rebellion, may, in some instances, have returned their husbands as soldiers when they were merely at present enrolled in the militia. Every effort was made to guard against this misconception, however, and if such instances occurred it was impossible to detect the error, as it was also impossible to prevent omissions which may have occurred on account of lack of knowledge as to the fact in question on the part of those upon whom the enumerator was obliged to depend for information, no means of verification being available to the Bureau. The figures, while undoubtedly in the main correct, should be regarded as approximate rather than absolute.

* Including under this head, for convenience of tabulation, persons of either sex deprived by death of husband or wife, and not re-married.
